## POLAND CITES KRUPP CHAIRMAN BEITZ FOR "HUMANISTIC" ATTITUDES

WIESBADEN, BRD, Nov. 2 (IPS)—The People's Republic of Poland threw away its morality yesterday and awarded Rockefeller agent Berthold Beitz, chairman of Krupp Steel, the Order of the Commandant with Stars. In a ceremony that by the Nuremburg statutes for crimes against humanity should never have taken place, Beitz received the following citation: "Poland values the humanistic and positive attitudes of Beitz to the Polish people during the war."

As a "liberal" Nazi during World War II, Beitz exploited Polish resources to the fullest for the Rockefeller-dominated Shell Oil Company branch in Nazi-occupied Poland. He arranged for the shelter as protection of selected Poles, who later became influential in the economics section of the Polish Communist Party. It is suspected that Beitz, through his ties to Shell and procuring of forged identity papers which he furnished to influential Poles, was a British intelligence agent who established a CIA-British Intelligence agent network throughout the Polish Communist Party.

Most likely as a reward for such good work in Poland, Beitz was made a Krupp official by the well-known Rockefeller confederate John McCloy, then U.S. High Commissioner for Germany. McCloy's right-hamman Stuart Stone, along with McCloy, installed Beitz as chairman of Krupp in 1953. Stone's recent return to open up a branch of the CIA's Aspen Institute in West Berlin exemplifies the arrival of the Second U.S. Occupation of Europe.

Since 1953, Beitz has traveled regularly to McCloy's office at Chase Manhattan Bank and to Stone's old office in the Ford Foundation of directions. Beitz has set up, among other deals, a Krupp slave labor project with the Shah in Iran and he has directed the job destruction presently rampant in European industry.

Poland's award to him ranks with the preliminaries of the Hitler-Stalin pact.

## GERMAN CP ISSUES "WANTED POSTER" IN MILD ATTACK ON NAZI MURDERER

WIESBADEN, BRD, Nov. 2 (IPS) -- The German Communist Party (DKP) recently mass distributed a "Wanted Poster" leaflet on Nazi murderer Hans Gunther Sohl in the working class Ruhr district.

Sohl, as supervisor of raw materials for Krupp Steel during World War II, supplied the Krupp death factories with hundreds of thousands of Nazi concentration camp slaves who were quickly worked to death. He avoided prosecution as a Nuremburg criminal only by switching employers and working for the American occupation forces.

helping to set up the working class starvation and speedup period known as the "Allied Occupation."

Presently head of the German Industrialists' Association, Sohl, along with chairman of the giant Metal Workers' Union Oskar Vetter and chairman of the West German Trade Union Confederation Eugen Loderer, now works for Rockefeller as a member of his Trilateral Commission.

The DKP came out with this mild attack on Sohl a week after New Solidarity exposed him as responsible for the deaths of thousands of Krupp slaves. Their leaflet stated merely that Sohl "caused the death of 16,000 jobs" and that he is a "former Nazi war economy leader."

Unless the DKP denounces Sohl, Vetter, and Loderer as Rockefeller agents responsible for carrying out present job destruction in Europe and trying to establish a new Nazi Reich, the international working class will not take their protests seriously.

## AGRICULTURAL REPORT

## U.S. LABOR PARTY LAUNCHES FARM-BELT ORGANIZING DRIVE

Nov. 2 (IPS)--In an exclusive IPS interview, the U.S. Labor Party candidate for New York State Attorney General Ray Martino outlined plans for consolidating a farmer-worker alliance following the November elections. According to Martino, the Labor Party's farm-belt activity has been greatest in the Illinois/Iowa "Quad Cities" regionand in upstate New York.

Most farmers around the country are still watching the Labor Party from a "safe distance" after the initial Labor Party farm organizing campaign last July. But some Iowa farmers—who are among the most politicized in the country—have agreed to join the Labor Party Stop Rockefeller/anti-slave labor legislation drives by calli their Congressmen and getting the word out to other farm families. A few plan to become New Solidarity distribution and briefing point in their counties. A similar process is underway in upstate New Yo where Martino, a resident of the Goshen dairy center, has been organizing actively.

The Labor Party strategy for the immediate future is to concentr te on these regions, while maintaining contact with farmers in more distant parts of the country through New Solidarity subscriptions, the IPS Agriculture Report, and the word-of-mouth iefing network. This week a Labor Party programmatic circular is going ou to key farm contacts, and campaign caravans are planned to push rig up to farmers' doorsteps in these activists' home areas.
