

on the deepening depression which threatens to go out of his control any moment.

There is even the possibility of an early death for Rockefeller's "anti-imperialist" OPEC. Hudson's commodity expert was ecstatic: "Didn't I tell you! Didn't I tell you these commodity cartels will not work? I always disagreed with Fred Bergsten [Brookings commodity expert who supported the cartels and had a leading role in organizing some of them] on this issue."

Clearly the Hudson conservatives intend to make the most of their coveted new position as Rockefeller's pet "think tank."

CANADIAN WORKERS AND TECHNOLOGY TO BE SHIPPED TO IRAN

Dec. 17 (IPS)--Iranian Premier Amis Hoveida ended a six-day visit to Canada this weekend, arranging for the export of both Canadian technology and workers to Iran. Hoveida expressed interest in investing in the energy development programs of Ontario and Quebec and in purchasing nuclear power plants from Ontario. As Hoveida commented, "We are interested in importing foodstuffs and skilled personnel as well as investing in Canadian pulp and paper and mining."

A press representative in Ottawa told IPS that the main line of speculation circulating throughout Hoveida's visit was that Iran wanted to establish joint ventures with Canada in both Iran and Third World nations, using Canadian technology and Iranian money.

Iran, securely under CIA control, is slated as a recipient for much of Rockefeller's relocation of the advanced sector industry. Hoveida also intends to have Canadian workers train Iranian workers.

A joint commission of senior government officials was established to arrange the details of the investments. Hoveida promised that \$1 billion was now appropriated for Canadian industry.
