

More Dangerous Than Nuclear War

If IMF policies continue, the deadly tse-tse fly

may be ruling the world by the 1990s!

That's what *EIR's* new Special Report, "Economic Breakdown and the Threat of Global Pandemics," shows.

An exclusive presentation of the causal relation between economic policymaking and the outbreak of new deadly diseases.

- Features the world's only handbook for the general policymaker, on how pandemics are being generated and where they will next break out;
- Over 70 pages, including charts, maps, and graphs demonstrating the U.S. vulnerability to biological warfare;
- Prepared by the *EIR* scientific task force which 11 years ago forecast the precise location and time of the currently erupting epidemics in Africa.
