An Emergency War Plan to Fight AIDS

EIR's Biological Holocaust Task Force has prepared the world's only science-intensive "Emergency War Plan to Fight AIDS." The newest discoveries of optical biophysics and advanced laser technology can improve diagnosis and lead to research breakthroughs—if governments move now.

The War Plan begins with the President of the United States, in his capacity as civilian leader and commander-in-chief, declaring a War on AIDS and invoking National Emergency powers to avert disaster. In parallel, heads of state of other nations of the Western alliance shall declare war on this scourge to mankind.

A 150-page *Special Report* for governments, scientists, public health officials, and all citizens concerned with a policy to fight AIDS, before a pandemic wipes out millions.
