EIR

From the Editors

Even as this issue of *EIR* enters final preparation for delivery to subscribers, we are producing an immediate offprint of the *Feature* package for delivery to the U.S. Congress, and to influentials around the world. This package has been conceived to provide the necessary strategic focus, and the iron-clad documentation of the British Empire's role in creating the "Ukraine crisis," which together will create the conditions so Congress can finally act to remove Obama, and open the way to a new just world economic order of cooperation and progress.

LaRouche's introductory article, "History Is Closing In on Obama," proceeds from the long wave of history to define the level on which a war of extinction can be avoided, and the basis for a new Constitutional system in the United States—a prerequisite for the necessary global shift—established. That long wave of history points inexorably toward the doom of the British Empire, and Obama. Its complement, "The British Imperial Project in Ukraine," is an object lesson in that strategic method applied to the neo-Nazi takeover now aiming to use Ukraine to trigger world war. Our research team rips the mask off the leading players in the Ukraine gambit, exposing them as the diehard Nazis they are, and presenting the challenge: Will the Western "democracies" really go to war to defend these Nazis, as British monarchy outlets like the London *Economist* demand?

Our news analysis sections—featuring Obama's troubles (*National*), the Chinese challenge to British imperial control over Africa (*Economics*), and global war provocations (*International*)—update more specifically the contest between the forces of Empire and humanity.

This issue also features an in-depth presentation on the energy of the future, thermonuclear fusion energy, by LaRouche Scientific Team member Megan Beets (*Science*). Beets shows both the history of the promise of fusion, and the process of its sabotage by the British-spawned Malthusian forces, who have systematically dismantled promising fusion programs, and now, under Obama, threaten to kill this life-saving energy form entirely. There were many points at which this sabotage could have been stopped—and right now may be the last such opportunity.

Finally, we'd like to point your attention to the story on the Kesha Rogers campaign for Senate (*National*), and urge you to check for updates under Hot News on our website. This primary runoff election on May 27 has the potential to create a decisive shift in U.S., and thus world, politics for the better, and we'll be reporting on it in depth.
