EIR Releases ‘The New Silk Road Becomes the World Land-Bridge’

EIR’s comprehensive study of the progress of the Eurasian Land-Bridge project which Lyndon and Helga LaRouche have championed for over 20 years, has now been completed. The official release date is Dec. 1.

The 374-page report, entitled “The New Silk Road Becomes the World Land-Bridge,” is nothing less than a conceptual, and often physical, “road-map” to a New World Economic Order. This path is currently being charted by the nations of the BRICS—Brazil, Russia, India, China, and South Africa—which are leading a dynamic of global optimism toward real economic development, complete with new credit institutions and major high-technology projects for uplifting all mankind.

After an introduction by Helga Zepp-LaRouche, the report lays out the “Metrics of Progress,” based

on the economic-scientific principles developed by renowned physical economist Lyndon LaRouche. It then proceeds region by region, beginning with China and Russia, to present the stunning progress, and plans, which have been made toward the Eurasian Land-Bridge design that the Chinese government laid out in 1996, and other nations have begun to rally around in recent years.

The full table of contents is available on the [LaRouchePAC website](http://LaRouchePAC.com).

The report, complete with many full-color maps of its featured development corridors, is now available in [pdf format](#) for \$200, and will soon be available in hard copy, for \$250. It puts before the world the vision mankind so desperately needs: a program of worldwide collaboration around the common aims of mankind.
