

In Commemoration of The Tsunami Victims

This statement was proposed to the seminar by Dr. M.K. Saini from New Delhi.

The enormous tragedy unleashed by the killer wave tsunami in Southeast Asia destroyed the lives and assets of millions of common men in Indonesia, Thailand, Sri Lanka, and India. All of them were citizens of the world.

In this hour of unbearable pain suffered by the helpless millions, we must stand by them. We express our deepest sympathies for the families of those who died and express our firm commitment to help their families. We must become the voice of hope for them.

The LaRouche International Movement has from the early 1970s worked out concrete development programs for Africa, South America, the Pacific Basin, India, Southwest Asia, and Eurasia. These programs, taken together, could provide a concrete basis for a New and Just World Order. The time has come to work in this direction immediately.
