

Another of the Many Dark Sides of Vaccines. Getting the “Vaccine” After Having Had the Infection

Covid Vaccines Can Be Deadly for Patients who have been Previously Diagnosed with COVID-19

By [Luke Yamaguchi](#) and [Dr. Gary G. Kohls](#)

Global Research, April 12, 2021

[The Dark Side of Vaccines](#)

Introduction by Dr. Gary G. Kohls

If Pfizer, Moderna, Johnson & Johnson, AstraZeneca or any of the host of for-profit, Vaccine Pushing, corporate-connected entities that inhabit the CDC, the NIAID, the NIH, the Departments of Health, Dr Fauci, Dr Osterholm, Dr Offit, Dr Hotez, “Dr” Bill Gates, the World Economic Forum, the WHO, your personal physician, your nurse practitioner, your neighbors or friends, your hospital or clinic CEOs or your talking heads on TV urge you to get the Covid shot after already having had the disease (or perhaps even simply having had a “positive” PCR test along with some influenza-like symptoms), you will know that you are being given irresponsible, dangerous, potentially lethal advice from a relatively vaccinology-illiterate source that probably has financial conflicts of interest, and you should search elsewhere for unbiased, ethical advice.

Shamefully, all of the truly science-based, vaccinology-literate sources of accurate information have had their “dangerous” books figuratively burned or black-listed/banned from YouTube, Google, FaceBook, etc., – a reality that should make everybody eager to know exactly what is so threatening to the industries of Big Pharma, Big Media, Big Medicine and assorted for-profit governmental agencies, all of which that have been turning once-honorable vaccinologists into crass pseudo-scientists who do what their corporate paymasters demand of them.)

Getting a Covid “vaccine” after having had the infection should be regarded as a relative contradiction until comprehensive clinical studies are done that have established both short and long-term safety and efficacy. So far there are no such research studies being done. Vaccine Pushers are not interested in getting to those truths and the propaganda has been so intense, that the narrative has been established, so that admitting that there are problems is not an option.

However there is already plenty of evidence exposing the dangers of blindly inoculating everybody on the planet (Bill Gates wants all 7+ billion people – including infants – to be inoculated and then given regular booster shots with any one or more of the experimental

Covid “vaccines”!). The following article summarized important information that is accumulating in the CDC’s **Vaccine Adverse Events Reporting System (VAERS)** – recognizing that only about 1% of actual adverse events ever get reported to the site.

The author of this important piece – Luke Yamaguchi – had to do a lot of pain-staking research to collate the information on the patients (as of April 1, 2021) that died after receiving the Covid-19 shot. Because the full article came to well over 5000 words, I have abbreviated for this Duty to Warn article it by deleting the clinical data for each of the patients. That information can be easily obtained by clicking on the link provided.

Dr. Gary G. Kohls, April 11, 2021

On January 26, Dr. Hooman Noorchashm sent [an open letter](#) to the FDA and Pfizer warning of the potential dangers of giving Covid vaccines to people who have already had (or currently have) COVID-19. As a physician-scientist with an MD and PhD in cellular immunology, Dr. Noorchashm based his warning on an “immunological prognostication” outlined below:

- People who have recently had (or currently have) COVID-19 can have viral antigens present in the endothelial lining of blood vessels, among other tissues.
- If these viral antigens are present, the immune response triggered by Covid vaccination will target these tissues causing inflammation and damage.
- In blood vessels, this can result in blood clot formation with the potential for major complications.

In other words, people who have previously had COVID-19 will be at greater risk of adverse events if they receive Covid vaccinations. To be clear, this is a theory based on an understanding of immunology. But is there any evidence to support this hypothesis?

According to [an article](#) in The Telegraph, recent data shows that Covid vaccine side effects are seen up to three times more often in people who have previously had COVID-19. The data comes from the King’s College ZOE app which has logged details from more than 700,000 vaccinations. The ZOE data shows that 12.2% of people reported side effects after their first dose of Pfizer vaccine, but that jumped to 35.7% in people who had previously had COVID-19. For the AstraZeneca vaccine, 31.9% of people reported symptoms following their shot, rising to 52.7% for people who had previously been infected with COVID-19.

In addition to this data, anecdotal stories in the news suggest that some people who previously had COVID-19 and recovered, died after receiving a Covid vaccination.

Dr. J Barton Williams, a 36-year-old orthopedic surgeon from Tennessee, is one such case. According to [a local news report](#), Dr. Williams died of a “COVID-related illness” known as multi-system inflammatory syndrome that causes inflammation in the blood vessels and other tissues. He also tested positive for COVID antibodies, meaning he previously had COVID-19 but never knew it. Dr. Williams died just weeks after receiving his second Covid vaccination.

It is ironic that he survived COVID-19 without even knowing it, only to die after receiving a Covid vaccine intended to save his life.

In another [news report](#), a California resident who had tested positive for COVID-19 in December, died just hours after receiving his Covid vaccine on January 21, 2021.

Turning our attention to the [Vaccine Adverse Events Reporting System](#) (VAERS), we see many such cases of people who got COVID-19 and survived, only to die soon after receiving their Covid vaccine.

What follows in Annex is a compilation of such cases.

ANNEX

Deaths Same Day as Vaccination

[VAERS ID: 940955](#)

Age: 66 COVID history: Yes

Sex: Female Vaccinated: 1/11/21

Location: New York Date died: 1/11/21

[VAERS ID: 967830](#)

Age: 64 COVID history: 12/24/20

Sex: Male Vaccinated: 1/21/21

Location: California Date died: 1/21/21

[VAERS ID: 915682](#)

Age: 85 COVID history: 11/17/20

Sex: Female Vaccinated: 12/30/20

Location: Kentucky Date died: 12/30/20

[VAERS ID: 914961](#)

Age: 88 COVID history: Yes

Sex: Female Vaccinated: 12/30/20

Location: Kentucky Date died: 12/30/20

[VAERS ID: 915920](#)

Age: 96 COVID history: Yes

Sex: Female Vaccinated: 12/28/20

Location: Ohio Date died: 12/28/20

[VAERS ID: 924456](#)

Age: 85 COVID history: 1/3/21

Sex: Female Vaccinated: 1/5/21

Location: California Date died: 1/5/21

Deaths One Day After Vaccination

[VAERS ID: 1082717](#)

Age: 88 COVID history: 1/16/21

Sex: Female Vaccinated: 2/16/21

Location: Arizona Date died: 2/17/21

[VAERS ID: 1106667](#)

Age: 67 COVID history: 6/3/20

Sex: Male Vaccinated: 3/12/21

Location: California Date died: 3/13/21
