

Boosters Boost Infections, “Omicron Mild”, Least Vaccinated Countries Fewer Deaths, Vaccinated at Greatest Risk

In the UK, after Government manipulation of hospitalisations and deaths to exclude more recent data, the truth is now emerging. In Scotland for August to November 2021 over 85% of deaths were in the vaccinated. Boosters are merely boosting COVID infections. Some 40,000 deaths have occurred in the USA, UK and EU following vaccination but Omicron is mild. The UK Government has manipulated the data to blame the unvaccinated but the vaccinated are at greatest risk.

It was clear [from the first cases in South Africa and now in the UK and EU](#) that the new Omicron variant of the coronavirus results in mild disease and very few deaths even “with COVID”. Indeed South African experts have advised stopping stop and trace and quarantining because most of the infected have no symptoms.

Considering the thousands of deaths and millions of injuries worldwide caused by the COVID vaccines there is very little difference between the decline in deaths between the least and most vaccinated countries.

LEAST VACCINATED COUNTRIES:

(Average vaccination rate 21%)

Decline of deaths from most recent peak:

Tanzania	100%
Nigeria	98%
Ethiopia	89%
Kenya	91%
Egypt	36%
S. Africa	92%
Pakistan	95%
Russia	18%

Average decline in deaths for 8 least vaccinated countries: 77%

MOST VACCINATED COUNTRIES

(Average vaccination rate 88%)

Decline of deaths from most recent peak:

UAE	90%
Cuba	98%
Chile	89%
Portugal	91%
Singapore	83%
Cambodia	94%
S. Korea	17%
Canada	98%

Average decline in deaths for 8 most vaccinated countries: 82%

If we take the 3 *least* vaccinated countries their decline in deaths from the recent peak averaged 95% whereas the three *most* vaccinated achieved 92%

With a vaccination rate 4 times the least vaccinated countries the 8 most vaccinated countries produce a mere 5% better decline in deaths from their recent peaks. A paltry return for vaccines which have caused nearly 2,000 deaths in the UK, 9,000 in the USA and 31,000 in the EU.

Even the Lancet has shown the vaccines do not work – as the third jab and talk of a fourth testify. To quote from the Lancet study:

“In the UK it was found that secondary attack rates among household contacts exposed to unvaccinated index cases was similar to household contacts exposed to unvaccinated index cases (25% for vaccinated and 23% for unvaccinated)”

VACCINATED AT GREATEST RISK OF DEATH

In the UK, after Government manipulation of hospitalisations and deaths to exclude more recent data, the truth is now emerging. In this graph from Scotland for August to November 2021 over 85% of deaths are in the vaccinated.

An exposure of how the Government [has manipulated the data to blame the unvaccinated appears here](#): It turns out that the source of the statement “Of the Covid patients treated in intensive care in recent months, the majority – nearly 75 per cent according to the latest data – have chosen not to be vaccinated.” was data from May to July. The data above (from Scotland from August to November) suggests the exact opposite.

More evidence of the failure of vaccines in the face of new infections comes from the USA where one of the largest US outbreaks of the new Omicron variant to date is believed to have occurred at Cornell University in Ithaca, New York, where almost all 930 cases over the past week are believed to be of the variant.

All of the confirmed Omicron cases in the Cornell University case are among people who are fully vaccinated, and some of them are in people who've also had the booster.

The booster is of course more of the same in the hope that the third dose will do what the first two doses were supposed to do! And the new variant, "omicron"?

Most of the Omicron cases in the United States have been among the vaccinated, the Centers for Disease Control and Prevention (CDC) said in an update on Friday 10/12/21. *Most patients have experienced mild symptoms.*

OMICRON IS WEAK

Indeed it was clear from the first cases in South Africa that the new Omicron variant of the coronavirus results in mild disease, without prominent symptoms and it:

"presents mild disease with symptoms being sore muscles and tiredness for a day or two not feeling well. So far, we have detected that those infected do not suffer loss of taste or smell. They might have a slight cough. There are no prominent symptoms. Of those infected some are currently being treated at home"

– as Angelique Coetzee, the chairwoman of the South African Medical Association described it. Indeed the case fatality rate in S Africa – deaths as a proportion of cases 10 days earlier – was at the lowest level since covid started.

In the UK a mere 12 deaths have been "with" Omicron – in other words not death "from" Omicron!

The World Health Organization's [weekly epidemiological update](#) for Dec. 7 showed that all 212 Omicron cases documented across eighteen European Union (EU) countries were either mild or asymptomatic.

Everywhere the Omicron variant seems to be supplanting the Delta variant but with much milder symptoms so that as the South African doctor Omar Hamada said the [Omicron](#) variant of COVID-19 may provide natural immunity without inducing severe illness, as the symptoms so far resemble more of a "mild, common cold" in South Africa.

"If the infectivity is greater, but the virulence or severity is less, this may be actually something good in terms of getting people immune to it without necessarily having to depend on a vaccine that's not incredibly effective," said Hamada.

BOOSTERS

The boosters being touted by Governments are controversial among experts. *"The boosters are a perfect way to bias our immune system so we're LESS able to respond to this new variant,"* said Dr Robert Malone the inventor of the mRNA vaccine.

"This is [like] jabbing everybody with a flu vaccine from three seasons ago and expecting it

to have effects against the current [flu strains].”

A top World Health Organization ([WHO](#)) official said there was “no evidence” to suggest that the vaccine booster doses would offer “greater protection” to healthy people. Dr. Mike Ryan, the WHO’s emergency director, questioned the logic of some countries trying to produce more booster doses to vaccinate anyone aged 18 and older.

“Right now, there is no evidence that I’m aware of that would suggest that boosting the entire population is going to necessarily provide any greater protection for otherwise healthy individuals against hospitalisation and death,” Ryan [said](#).

France has even banned the Moderna booster.

UK BOOSTERS BOOST INFECTIONS

On 1st October when the Boosters started in the UK 153,912 were vaccinated. On 18th December there were 904,598 vaccinated an increase of 487%

New Infections on 1st October were 34,752 while on 18th December there were 90,109 new infections – an increase of 159%. Since there is a delay between vaccination and infection it is probable that that percentage increase in infections will catch up with the prior increase in vaccinations. And that further increase will lead the politician to call for more vaccinations and ruinous lockdowns!! which will in turn lead to more infections and so on *ad absurdum* and *ad infinitum*.

[worldindata.org](#) compared the European countries which had given boosters with those countries that had not and found that the infections gap between them was growing – from 19% more infections for the Booster countries to 21%.

It is quite clear that (as in previous periods of vaccine increases) there has been a consequent increase in COVID infections. This is a world wide pattern since vaccination programmes started. The excuse (if there is one at all given the horrendous numbers of deaths) was that those who fell ill were not so seriously ill as those who were unvaccinated. But that too we now know (see above) is rubbish.

The terrible toll of deaths and serious injuries among nurses, doctors, airline pilots and sportsmen around the world is unprecedented for any vaccine, never mind one which has proved so useless in preventing infections, infectiousness and deaths. The next Freenations post will deal with those deadly consequences.
