\*\*\*

*About a week ago, the UN Human Rights Czar in Geneva issued a stern warning – “Up to 80 million people will be plunged into hunger if climate targets are not met”.*

*These are the words of Volker Turk, the head of the UN Human Rights Council in Geneva, Switzerland. He spoke at a Human Rights event, and highlighted as principal cause for this coming calamity – what else – “climate change”. He said,*

*“extreme weather events were having a significant negative impact on crops, herds and ecosystems, prompting further concerns about global food availability.”*

This is immediately proven by never-before-in-history extreme floods in Vermont, USA, by extreme droughts in Europe and Central – Western USA and by enormous, never-before experienced – forest fires in Canada. More is already announced – extreme Monsoon rains in India, and possibly Bangladesh. What a coincidence. Except, there are no coincidences. Droughts and gigantic flashfloods, in calculated interchange. No coincidences.

Most people of this globe just simply cannot believe how evil some non-people are. The Covid crime and the vaccination genocide was not enough to open their eyes, that their governments cannot be trusted, that they are sold, either by money or by threats, to an extreme evil power, a Depopulation, a Eugenics Cult which is behind it all.

Mr. Turk went on claiming,

*“More than 828 million people faced hunger in 2021, and climate change is projected to place up to 80 million more people at risk of hunger by the middle of this century.”*

Further contributing to the drama, he added, *“Our environment is burning. It's melting. It's depleting. It's drying. It's dying”*; and that these factors will combine to lead humanity

towards a “*dystopian future*” unless urgent and immediate action is taken by environmental policymakers.

And then came the MUST reference to the 2015 (COP) Paris Agreement often referred to as the *Paris Climate Accords*, which were adopted by 196 parties at the time. COP means “Conference of the Parties”. Adding to the confusion of UN jargons, it refers to the UN Framework Convention on Climate Change (UNFCCC), whose signatories agreed to cap global warming below 2 degrees celsius above the 1850-1900 levels – or to 1.5 degrees celsius if possible. Does anyone understand the language to carry out this easy task?

Such an arrogant statement – humans making the weather with their sheer lifestyles – should already ring a strong bell in a clear-thinking mind of normal humans, but it doesn’t, because our pineal gland for logical thinking and perception of emotions has been gradually dumbed, reduced, even killed in some people with chemicals we eat regularly and imperceptibly in our daily food, chemicals sprayed from the air via chemtrails, “disinfectant” chemicals in the water, the uncountable PCR tests, with absolutely scientifically proven unnecessary sticks up the nose, to the thin separation between nose and brain – and pineal gland — and more.

To dull our sentiments and perception is a long-term goal that “our Masters” have been working on for the last at least hundred years – or longer.

Dulled minds are easier to manipulate. Add to this DARPA’s MK-Ultra and Monarch mind-manipulation program and we know why we are where we are.

Our mental desensitization is the product of a long-term plan, namely precisely the plan that is currently being implemented by the WEF’s Great Reset and the UN Agenda 2030. That just shows that the UN is totally compromised by a “deep state” system, or Diabolical Cult that is way stronger than all our international agencies together.

Incidentally, Bill Gates said once in an interview that even should he “disappear”, the system goes on; it had been prepared for a century or more. You won’t find this reference anymore anywhere on internet. But this is the level of well-planned evil that we are facing NOW – The Great Reset, the UN Agenda 2030, and the all-digitizing 4<sup>th</sup> Industrial Revolution. All executed by the World Economic Forum (WEF), the United Nations, and the World Health Organization (WHO).

They are the willing forefront of an enormously powerful financial behemoth which wants to stay in the dark, both literally and figuratively. Those who work the buttons for the Monster, have been promised “paradise”, or being part of the elite. Enough to buy their soul.

This financial elite system is controlling every sector of production, of food supply, of energy availability, and, indeed, of “climate change”. Yes, man-made climate change, but **not the type that is supposedly carbon-based and depending on the human carbon footprint.**

We are talking about highly sophisticated Environmental Modification Techniques (ENMOD), that are and have been causing extreme monsoons in Pakistan last year, this year already announced in India and possibly Bangladesh, and wherever an unruly population needs to be reined in, and where basic infrastructure and housing, as well as food crops must be

destroyed, in order to create human misery, famine and death – and as a byproduct human obedience.

Would anybody like to pretend that Mr. Human Rights, Mr. Turk, when he speaks at the Human Rights Council in Geneva, does not know the facts? He is betraying the very people he has been mandated to defend and protect.

Massive depopulation, meaning, worldwide genocide, never seen before in human history – currently ongoing – it is **Number One** of the REAL 17 Sustainable Development Goals (SDG), i.e. UN Agenda 2030. What the 17 SDGs say on the surface is but a smoke screen. The real meaning is reflected in this depiction – in Spanish – from *Thereal2030.org* – see [this](#).

What Mr. Turk, Human Rights advocate, is saying goes exactly in the opposite direction of Human Rights. Mr. Turk, as the UN defender of Human Rights, the world's highest Human Rights Officer, instead of protecting humans, he is sending them to death with the "climate change" narrative, with the false pretense that climate change will create and increase massive famine and death, if humanity and their leaders will not adhere to the 2015 Paris Climate Agreements.

This narrative is correct when applied to the since the 1940's scientifically developed, today highly sophisticated ENMOD technologies. But people do not know, they are on purpose being indoctrinated that the "climate change" which they live is the result of humanities excessive carbon footprint. **That is an absolute lie.**

Mr. Turk, like all those who order him to help reduce humanity rather than protect humanity, knows very well that humans cannot change the climate by reducing the carbon footprint, because the human carbon footprint has an absolute minimal impact on what is called "global warming" or "climate change".

Even if humanity would reach a "net zero carbon emission", the climate would keep changing as it did for the about 4 billion years Mother Earth exists. The earth, like all the planets in the universe are dynamic beings, lives, if you will.

The climate is not influenced by humans, but to more than 97% by the sun, by sun movements. This is attested by any serious scientist – and more and more of those come to the fore to confront the ever-growing climate crime. And these sun-influenced dynamic changes are slow processes, over thousands of years, not noticeable within the extremely short time span of a human life.

Today, the world's total energy use is still based to about 85% on hydrocarbons, and unless the world economy is made to completely collapse by the infamous slogan of "net zero carbon use", or there is a sudden breakthrough in converting the endless sun energy by photo synthesis to energy, what the plants do, humanity's survival depends on hydrocarbons for many more years to come.

Dear Mr. Turk, Defender of Human Rights – you must know this, in the high position you are honored to hold, don't you?

Where is your conscience, Mr. Turk, when you ring the alarm bell on innocent, already deprived people with famine, with a rapid increase of famine, and consequently with a rapid increase of death resulting from famine, when YOU know that the only man-made climate

change is the one nobody talks about, the one emanating from the man-made ENMOD technologies.

The science of ENMOD, including HAARP (High Frequency Active Auroral Research Program) is being weaponized, has been gradually weaponized for years. The science is known since the 1940's and has been perfected to sophistication since then. It can even trigger earthquakes – has done so already on several occasions – killing thousands of people, leaving the masses under the impression that they became victims of a “natural event”.

ENMOD is weaponizing the climate.

The technologies of environmental modification can be and are applied clandestinely, most people have no clue what happens, when for example western summers are hot and dry like never before, when forests burn – put aflame by paid arsonists – and pollute the air for weeks and over thousands of square kilometers, when sudden, mighty thunderstorms bring flash-floods to overheated and dried out soil to slam down the final stroke to food crop destruction.

The media tells them: Claim it on “climate change” and help reduce your carbon foot print, do not eat meat, do not drive cars, do not fly, stay home, adapt to a modern lockdown. The new 15-minute cities are ideal for you, the commons.

Have you noticed how commercial flying is gradually becoming unaffordable for the common people, while of course, the rich and famous, the all-commanding elite couldn't care less and keep using all the more their private jets to roam around the globe. Their carbon footprint is immaterial.

They laugh at the commons whose brains, and especially pineal glands, have been dulled by 5G ultra-microwaves, chemtrail-chemicals, water disinfectants – and more – so that the majority still falls for their governments lies that they better follow the rules, the “rules-based order” that replaced constitutional laws, or else.

Has anybody noticed? Nations' constitutional laws are being ignored. No judge in the world would uphold them against the elite-led order.

Mr. Turk, in your recent Human Rights advocacy speech in Geneva, you did not address the latest craziness and ultimate crime on humanity, the Washington and EU idea to block out the sunlight to cool down the earth. For the sake of saving humanity from “climate change”.

See [this](#) and [this](#).

Scientists have warned of devastating effects of climate “geoengineering”. Yet, the Human Rights Council has not brought it up. It is an unspeakable crime on Human Rights – as such weather and climate manipulation would abridge every Human Right.

Can you imagine what that would mean? Of course, instead of having a cooling effect to preserve the earth's temperature within the 2015 Paris Accord – an absurdity in the first place — it would have a disastrous killer effect. Every life form needs the sun and dies without it.

Blocking out the sunlight would be the ultimate killing machine to reach the Number One SDG *drastically reduce the world population*. You missed that one, Mr. Human Rights.

How can you sleep at night, Mr. Turk, scaring already desperately poor and undernourished people with more famine, because they and their governments do not follow the 2015 Paris climate rules, so they may face death?

Maybe your pineal gland, Mr. Turk, has also been killed and you have no longer any feelings for Human Rights, reason enough for having been placed into the position of the Human Rights czar.

The UN Human Rights Council's 53rd session ends on July 14. Thus, there are still a couple of days left to right your wrongs, Mr. Turk and your HR Council colleagues.

If not, We, the People, will do everything in our peaceful and spiritual minds to stop this climate crime, including divulging the real agenda behind the 17 SDGs and behind the illegal UN Agenda 2030, the WEF's Great Reset. We will be a critical mass to bring back decency and harmony to human life.
