Surveying the economy-shattering "climate change" lies for social control as relayed by our self-appointed technocratic overlords.

JPMorgan & Chase CEO Jamie Dimon's [annual love letter to his shareholders](#) opens with self-congratulation for maintaining profitability even in the current state of inflation – something that most middle-class or working-class Americans can't necessarily say.

After all, the American middle and working classes don't have Senators and regulators and presidents on speed dial, so why would they enjoy the economic largesse afforded to the architects of the multinational [merger of corporate and state power](#)?

Global neofeudalism is humming along at full speed. Still, the serfs' estates aren't shrinking fast enough [for the likes of the World Economic Forum](#).

JPMorgan & Chase, Dimon explains, has just the solution: confiscate what's left of their property for climate change under eminent domain.

Via [JPMorgan Chase & Co.](#) (emphases added):

"The window for action to avert the costliest impacts of global climate change is closing...

Permitting reforms are desperately needed to allow [green energy] investment to be done in any kind of timely way. We may even need to evoke eminent domain – we simply are not getting the adequate investments fast enough for grid, solar, wind and pipeline initiatives. Policies like the Bipartisan Infrastructure Law, the Creating Helpful Incentives to Produce Semiconductors (CHIPS) and Science Act, and the Inflation Reduction Act (IRA) — that hold the potential to unlock over \$1 trillion in clean

technology development — need to be implemented effectively.”

Irish government announces genocidal intentions against nation's cows

[As I recently covered elsewhere](#), the captured government of Ireland is planning to sacrifice many thousands of cows to the climate change gods.

Leaked documents suggest the Irish government is planning to cull 65,000 cows a year for the next three years, at a cost of 200million euros a year, to meet its climate targets. Get ready for more, not less, of this insanity. pic.twitter.com/gQ7QB06tif

— RAW EGG NATIONALIST (@Babygravy9) [June 1, 2023](#)

The phenomenon of suicidal governments immolating their own domestic agricultural industries, more or less the same phenomenon, [as I covered elsewhere](#), is underway in Third World nations like Sri Lanka as well as across Europe – all in the name of fighting something called “climate change” that the anointed “experts” don’t even bother getting into the specifics of anymore after their histrionic prior predictions of mass die-offs failed to come to fruiting.

Speaking of which, one little visionary autistic — a brave and stunning warrior of the climate change cause popular with all the right technocrats – recently passed an unceremonious milestone in her climate change prognostication career...

Deadline for Greta Thunberg's hysterical prediction of climate change apocalypse comes and goes

Via [Western Journal](#), June 20th:

“Five years ago, almost to the day, Greta Thunberg made an apocalyptic claim about the fate of the world, and now we know whether or not it has come true.

On June 21, 2018, the then-15-year-old Swedish climate activist sent out an alarming tweet that seemed to imply that due to climate change caused by fossil fuels, we had only five years left to act to prevent the end of the world.

“A top scientist is warning that climate change will wipe out all of humanity unless we stop using [fossil fuels](#) over the next five years,” the tweet read.

Now, it is nearly the five-year anniversary of Thunberg's dire warning, and to the surprise of almost no one, except perhaps Thunberg, the world has survived and appears to be going nowhere for the time being.”

JUST IN: According to Greta Thunberg's 2018 tweet, all of humanity will be wiped out by today. pic.twitter.com/ZeEZFRcozD

— WhaleWire (@WhaleWire) [June 22, 2023](#)

In a sane world, this kind of totally discrediting, overblown proclamation would be just that – discrediting and disqualifying from public life.

Instead, the corporate state media will silently move the goalposts, and their favorite Asperger’s mascot will be permitted to continue her histrionic forecasting of doom and gloom until we’re all locked down in 15-minute cities.
