

Pfizer's Track Record: Just Another "Too-Big-to-Fail" American Corporation

Explaining to the Dummkopfs at the CDC, the NIAID, the White House, the US Congress and the Mainstream Media why there is – and will always be – “Pharmaceutical Drug and Vaccine-hesitancy” Among the Semi-alert

By [Dr. Gary G. Kohls](#)

This column high-lights the unethical/criminal attempts of

the Trump-orchestrated, Biden-endorsed and Big Pharma-implemented Operation Warp-Speed,

the unethical plan to totally skip both short-and long-term animal safety and efficacy studies in order to promote potentially dangerous Covid-19 vaccines for both human adults and children.

Here is a very telling Announcement from the the American Academy of Pediatrics (AAP) website (May 4, 2021).

Be aware that the AAP membership relies on routine vaccinations for a large portion of the annual revenues)

“Children ages 2-11 could potentially be eligible for (the still-experimental) COVID-19 vaccine this fall. Pfizer Chairman and CEO Albert Bourla, DVM, PhD (Doctor of Veterinary Medicine!), [said on a quarterly earnings call](#) Tuesday. He expects to request (experimental) Emergency Use Authorization (EUA) from the Food and Drug Administration (FDA) in September. Under his plan, an EUA request for ages six months to 2 years would follow in the fourth quarter.

“Pfizer and its (German) partner BioNTech currently are waiting for an FDA decision on an EUA for adolescents aged 12-15 years.” (See [this](#))

The Pfizer track record below was collated and edited by Dr. Gary G. Kohls

Why it's Insane to Trust Pfizer's or Moderna's or Johnson & Johnson's or AstraZeneca's

Experimental, Fast-tracked Vaccines for Covid-19

*To back-up the accusation of “criminality” of Big Pharma corporations like vaccine-maker Pfizer, I attach a list of 14 **Pfizer** drugs that were FDA-approved for marketing before long-term safety Studies were done (Note that the corporate-controlled 1986 US Congress passed a law – signed by President Ronald Reagan – that made it against the law to sue pharmaceutical corporations for deaths or injuries caused by their vaccines!)*

Pfizer is one of the largest multinational pharmaceutical (drugs and vaccines) companies on the planet – and one of the five largest vaccine manufacturers (the five are **Pfizer, Sanofi, Merck, GlaxoSmithKline and Johnson & Johnson. (AstraZeneca is # 10).** **Pfizer** has faced numerous lawsuits – just in the US – for fraudulent marketing and medical injuries caused by its most profitable, drugs.

Pfizer holds the record for the largest fine paid for a health care fraud lawsuit filed by the U.S. Department of Justice. **Pfizer paid \$2.3 billion** in fines, penalties, and settlement for illegal marketing claims.

For details see:

[Video: Pfizer Has a Criminal Record. Is It Relevant?](#)

By [US Department of Justice](#), May 04, 2021

Here is a partial list of 14 of **Pfizer’s** most dangerous, most litigated, most potentially lethal drugs.

(NOTE: If any reader had adverse effects to any of these **Pfizer** drugs, he/she might want to consult an attorney).

Celebrex, Bextra, Geodon, Zyvox, Lyrica, Neurontin, Protonix, Prempro, Chantix, Depo-Testosterone, Zoloft, Effexor, Lipitor, Xeljanz, etc

Celebrex and Bextra

Prizer promoted its two COX-2 pain relievers **Celebrex** and **Bextra** which generated **7000 lawsuits and a \$894 million settlement**. Both medications were me-too drugs similar to **Merck’s** infamous **Vioxx**, which caused 50,000 lawsuits because of cardiovascular deaths and injuries. Merck settled most of the cases with a **\$4.85 billion settlement**.

Geodon, Zyvox, and Lyrica

Pfizer paid \$1 billion to resolve allegations under the civil False Claims Act that the company illegally promoted four drugs –**Bextra; Geodon**, an anti-psychotic drug; **Zyvox**, an antibiotic; and **Lyrica**, an anti-epileptic drug – and caused false claims to be submitted to government health care programs for uses that were not medically accepted indications.

Neurontin

Pfizer paid out **\$142 million** for committing racketeering fraud in the marketing of **Neurontin**.

Protonix

As part of a larger group of proton pump inhibitor lawsuits, Pfizer faced a number of **Protonix** lawsuits after it acquired drug company Wyeth who had been accused of marketing the drug for unapproved uses. In 2013, **Pfizer agreed to pay \$55 million** to settle illegal marketing claims, but the company may still be facing lawsuits for permanent **kidney damage** caused by **Protonix**.

Prempro

Nearly **10,000 Prempro lawsuits** were filed by women who had been diagnosed with **breast cancer**. The lawsuits were largely settled by 2012 for about **\$1 billion**.

Chantix

Pfizer faced about **3,000 Chantix lawsuits** filed by people who claimed they experienced **suicidal thoughts and psychiatric disorders** after using **Chantix** for smoking cessation. Pfizer set aside about **\$288 million** and at least some of the cases were settled.

Depo-Testosterone

Thousands of cases of medical injury due to testosterone replacement therapy have been filed. Other drug companies have paid \$ billions to settle their cases, however some **Pfizer** testosterone lawsuits were dismissed.

Zoloft

About **250 Zoloft lawsuits** were filed, claiming **Pfizer** actively promoted the use of Zoloft to pregnant women despite knowledge of **birth defect risks** from their research.

Effexor

Effexor was a medication originally produced by **Wyeth** which has also been the cause of multiple lawsuits. People who filed **Effexor** lawsuits claimed that it caused **birth defects**, and separately, **suicidal thoughts and behaviors**. In September 2015, **Effexor** lawsuits were dismissed but may have been eligible to refile.

Lipitor

Pfizer's drug that lowers cholesterol (but only minimally decreases heart attack and stroke risk) causes serious muscle necrosis (death), muscle weakness, diabetes and other unforeseen health defects has generated billions of dollars of lawsuits.

Xeljanz

Pfizer had failed to do long-term safety and efficacy studies on its new arthritis and ulcerative colitis drug prior to FDA-approval. Xeljanz was therefore only belatedly acknowledged by **Pfizer** to cause cancer, serious cardiovascular events and venous thromboembolism (such as pulmonary embolism or deep vein thrombosis). Many lawsuits are now in progress.

*

Environmental Pollution Lawsuits Against Pfizer

In 1971 the Environmental Protection Agency (EPA) asked **Pfizer** to end its long-time practice of dumping industrial wastes from its plant in Groton, Connecticut in the **Long Island Sound**. The company was reported to be **disposing of about 1 million gallons of waste each year** by that method.

In 1991 Pfizer agreed to pay **\$3.1 million** to settle EPA charges that the company seriously damaged the Delaware River by failing to install pollution-control equipment at one of its plants in Pennsylvania.

In 1994 Pfizer agreed to pay **\$1.5 million** as part of a consent decree with the EPA in connection with its dumping at a toxic waste site in Rhode Island.

In 1998 Pfizer agreed to pay a civil penalty of **\$625,000** for environmental violations discovered at its research facilities in Groton, Connecticut.

In 2002 New Jersey fined **Pfizer \$538,000** for failing to properly monitor wastewater discharged from its plant in Parsippany.

In 2003, shortly after **Pfizer** acquired **Pharmacia**, the company (along with **Monsanto**) agreed to pay some **\$700 million** to settle a lawsuit over the **dumping of known-to-be-carcinogenic PCBs** in Anniston, Alabama.

In 2005 **Pfizer** agreed to pay **\$22,500** to settle EPA claims that the company failed to properly notify state and federal officials of a 2002 **chemical release from its plant in Groton** that seriously injured several employees and necessitated a major emergency response.

Also in 2005, **Pfizer** agreed to pay **\$46,250** to settle charges that its **Pharmacia & Upjohn** operation had violated federal air pollution rules at its plant in Kalamazoo, Michigan.

In 2008 **Pfizer** agreed to pay a **\$975,000** civil penalty to resolved federal charges that it violated the Clean Air Act at its former manufacturing plant in Groton, Connecticut in the period from 2002 to 2005.

Environmental groups in New Jersey have criticized as inadequate a clean-up plan devised by **Pfizer** and the EPA for the **American Cyanamid Superfund** site in Bridgewater, which is considered **one of the worst toxic waste sites in the country**. **Pfizer** inherited responsibility for the clean-up through its 2009 purchase of **Wyeth**.

The Medico-legal Justifications for Refusing Experimental Vaccines that Have Not yet Been Tested for Long-term Safety OR Effectiveness

Vaccines that Haven't yet been Tested on Lab Animals are Being Promoted for Use in infants, Children and Adolescents!

Shame on the following groups of vaccinology-illiterate, Corporate-financed OR controlled individuals who know next-to-nothing about the many dangers of inoculated vaccines and yet urge

- 1) current or past US President,
- 2) US Cabinet-member (including NIH, CDC, NIAID/Fauci, FDA),
- 3) Federal or State Congressperson,
- 4) State Governor,
- 5) City Mayor,
- 6) City Councilmember (or other elected officials),
- 7) Every University Professor whose institution takes Big Pharma research money,
- 8) every journalist that blindly pushed Big Pharma's vaccine agendas while simultaneously not mentioning that every vaccine being (unethically, endlessly and nauseatingly) promoted are still EXPERIMENTAL (ie, not yet proven to be either safe or effective either long-term or short-term).

Here is a list of collaboratively-generated statements of irrefutable truths that need to be considered before some "government" agent approaches you and offers to inoculate you with a mixture of unknown ingredients that, even if known and confirmed, hasn't yet been proven to be either safe or effective:

I do not know what is in your vaccine, and I don't trust ANY global, profit-making corporation to tell the truth about what is in any of them.

I do not believe your vaccine is safe – only partly because lab animal safety or efficacy studies were never done on the product (thanks to President Trump's, Big Pharma-generated and President Biden-endorsed, the dangerously fast-tracked Operation Warp-speed).

I know that many vaccines have been found to contain inherently unsafe toxic adjuvants and toxic foreign materials.

I know that toxic contamination is present in vaccines which are easily preventable with current technology. This suggests intentional contamination of vaccines with toxic agents.

I know that many vaccines are not effective and actually cause the ailment they are purported to mitigate.

I know that adjuvants are put into vaccines to "shock" the immune system into extreme response, and that causes biological "crisis", stress and damage to the immune system, the blood and the whole body.

I know that vaccine death and injury statistics and information are suppressed/ignored by the mainstream media (including PBS and NPR!) which receives billions of dollars in Big Pharma advertising annually or are actually financially-sponsored by Foundations that have pharmaceutical industry roots.

I know that honest vaccine death and injury statistics and information are suppressed by government in which pharmaceutical regulatory agencies are largely run and controlled by Big Pharma industry executives, loyalists and lobbyists.

I am aware of reports that vaccine experiments have caused tens of thousands of cases of deaths, sterilization, polio, autism and other diseases and injuries globally.

I know that vaccines are so hazardous that the vaccine industry lobbied for and received (in 1986) legal immunity by the US government from the harm (including deaths and disabilities) vaccines are known to cause.

I know that taxpayers have paid billions of dollars to families whose members were injured or killed by vaccines.

I do not trust the profit-motivated vaccine industry or the government agencies (or international agencies) which seem to be acting on behalf of vaccine sales, share price, promotion and the suppression of information of vaccine hazards.

I know that most vaccines have not been tested or proven to be safe – either short-term or long-term.

I know that under current law all physicians and healthcare workers must have my fully-informed consent to administer medicine or vaccines to me. **My consent is hereby denied and refused.**

I know that non-physicians, (particularly elected officials or bureaucrats), may not administer medicines or vaccines, much less “mandate” medical treatments for the general population.

I know it is possible to mitigate and control all contagious diseases with safer and more effective means than unproven -to-be -safe vaccines.

Anyone who claims the authority or duty to inject materials in my body without my fully-informed consent is my enemy and is attempting to commit a criminal act – and is prosecutable.

I will treat anyone who threatens to violate my body as a criminal assailant.

No, you may not vaccinate me or my children. If you try, I will exercise my right to self-defense against you and your accomplices to any extent I deem necessary to protect ourselves.

Forced vaccination is not authorized or permitted under Founding Law.

If there is a code or statutory “mandate” for forced medication, it is unconstitutional, unlawful and unenforceable.

You may not attempt or threaten non-consensual vaccination, and if you do, you will be dealt with in a manner to restore rule of law, justice and to protect our right to personal physical security.

Your ignorance of vaccine hazards and medical rights and your inability to understand the facts above do not give you any immunity or any license to commit the crime of forced non-consensual medication.

Can you name every ingredient of your vaccine? Presumably not.

Can you predict the physical effects of each of those ingredients? No.

Can you predict the consequences of combining those ingredients? No.

Have you offered to personally take full responsibility to pay for any harm your vaccine causes? No.

Therefore, you do not have the slightest authority or privilege to forcibly administer vaccines.

Dr Gary G. Kohls lives in the USA and writes articles that deal with the dangers of fascism, corporatism, totalitarianism, militarism, racism, malnutrition, and Big Pharma's over-drugging and over-vaccinating agendas. In addition, his columns deal with cultural movements that threaten democracy, war, civility, health, freedom, the future of the children and the sustainability and livability of the planet.

His Duty to Warn columns have been re-published around the world for the last decade. Dr Kohls frequently writes about Big Vaccine's over-vaccination agendas and Big Medicine's over-screening, over-diagnosing and over-treating agendas.

Many of Dr Kohls' columns have been archived at a number of websites, including:
