We are becoming accustomed to unexpected death after COVID-19 among young persons who have taken one or more injections of the COVID-19 vaccine. It is important to realize that not all deaths after vaccination are cardiac.

A report from [McMillan et al](#) from the Department of Neurology, Harvard Medical School, Beth Israel Deaconess Medical Center, Boston, MA, USA, raised awareness to fatal neurological events that are possible after vaccination.

Fatal Post COVID mRNA-Vaccine Associated Cerebral Ischemia

Abstract

Background: Venous thromboses have been linked to several COVID-19 vaccines, but there is limited information on the Moderna vaccine's effect on the risk of arterial thrombosis. Here we describe a case of post-Moderna COVID-19 vaccination arterial infarct with vaccine-associated diffuse cortical edema that was complicated by refractory intracranial hypertension. **Case Summary:** 24 hrs after receiving her first dose of the Moderna COVID-19 vaccine, a 30-year-old female developed severe headache. Three weeks later she was admitted with subacute headache and confusion. Imaging initially showed scattered cortical thrombosis with an elevated opening pressure on lumbar puncture. An external ventricular drain was placed, but she continued to have elevated intracranial pressure. Ultimately, she required a hemicraniectomy, but intractable cerebral edema resulted in her death. Pathology was consistent with thrombosis and associated inflammatory response. **Conclusion:** Though correlational, her medical team surmised that the mRNA vaccine may have contributed to this presentation. The side effects of COVID-19 infection and vaccination are still incompletely understood. Though complications are rare, clinicians should be

Figure 1. Imaging **A:** Representative axial MRI brain images on day of admission. **B:** Eight days after admission, left panels represent diffusion weighted (DWI) sequences and right apparent diffusion coefficient (ADC) images. **C.** Hematoxylin and eosin (H&E)-stained section of leptomeningeal vessel with lymphocytic cuff **D.** H&E-stained section of leptomeningeal blood vessel with intraluminal organizing thrombus. Scale bars = 100µm.

McMillan N, Rosenberg HJ, Anderson MP, Pal P, Stephenson K, Fehnel CR. Fatal Post COVID mRNA-Vaccine Associated Cerebral Ischemia. *Neurohospitalist*. 2023 Apr;13(2):156-158. doi: 10.1177/19418744221136898. Epub 2022 Dec 5. PMID: 37064937; PMCID: PMC10091442.

"24 hrs after receiving her first dose of the Moderna COVID-19 vaccine, a 30-year-old female developed severe headache. Three weeks later she was admitted with subacute headache and confusion. Imaging initially showed scattered cortical thrombosis with an elevated opening pressure on lumbar puncture. An external ventricular drain was placed, but she continued to have elevated intracranial pressure. Ultimately, she required a hemicraniectomy, but intractable cerebral edema resulted in her death. Pathology was consistent with thrombosis and associated inflammatory response."

In a clinical trial, one Suspected Unexpected Serious Adverse Reaction (SUSAR) such as this would have put a pause on the entire study and an investigation into why this happened and

a call for risk mitigation measures to prevent the same complication from happening to more subjects. Ironically, this case reported at a Harvard hospital had no impact on Harvard University mandating vaccination from May 5, 2021, to [March 5, 2024](#). The FAQ/consent form signed by some of the nations brightest students made no mention of fatal cerebral ischemia and thrombosis as a direct complication of COVID-19 vaccination. I wonder if the editors of [Britannica](#) will fairly record this paradoxical and dangerous time in university history.

Harvard FINALLY drops COVID-19 vaccine requirement for incoming students

| Harvard University is no longer requiring students to get the COVID-19 vaccine to attend the institution.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. –Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
