Doctors for Covid Ethics has written three open letters to the European Medicines Agency regarding COVID-19 vaccine dangers. In those letters we have insisted upon evidence that risks of clotting, bleeding and platelet abnormalities were appropriately ruled out in legitimate empirical trials prior to human use. We foresaw deaths and harm from clotting, warning of these dangers before blood clots led to vaccine suspensions around the world.

The first letter, emailed February 28 and hand-delivered March 1st, can be found [here](#). The EMA’s reply of March 23rd can be found [here](#), and our rebuttal letter, of April 1st, [here](#), all summarised in a press release [here](#). Our most recent letter, warning that “cardinal symptoms of cerebral venous sinus thrombosis (CVST) dominate the list of adverse reactions to COVID-19 vaccines” is [here](#).

Doctors, scientists and colleagues in allied disciplines related to health, ethics, law and human rights can sign the open letters by sending their name, qualifications, areas of expertise and country of practice to: Doctors4CovidEthics@protonmail.com, with web verification (eg workplace or registration link, not for publication).

Signatories across the three letters are as follows:
