Fluoride has no role in any natural biochemical process in the human body.

For decades fluoride has been used and promoted for reducing dental cavities. In addition to its presence in toothpastes and other dental products, fluoride is added to municipal drinking water in three chemical forms: sodium fluoride (NaF), fluorosilicic acid (H₂SiF₆), and sodium fluorosilicate (Na₂SiF₆).

Fluorosilicic acid is a byproduct of phosphate fertilizer production, and has various other uses including rust removal cleaning products. Critics of fluorination of municipal drinking water point to various concerns including neurotoxicity and reduced intelligence in children who ingest it routinely.

Dr Bob Dickson MD is a Canadian physician who has dedicated much of his life to important humanitarian causes. He is passionate about ending the fluorination of water and improving our children's health and intelligence. This Calgary physician co-led the anti-fluoridation program in Calgary since 1999.

This resulted in Calgary's water fluoridation being halted in 2011. He is the founder of [Safe Water Calgary](#) and the [Chair of Fluoride Free Canada](#).

As we have seen with medical doctors who raise concerns about the covid-19 genetic "vaccines"; Dr Dickson is under investigation by the College of Physicians and Surgeons of Alberta because of his public education and activism regarding fluoride. In the context of the past four years, if anything, that only adds adds credibility to Dr Dickson's work. There is no conflict of interest for him.

Dr Dickson states that artificial water fluoridation lacks common sense, is highly unethical, violates the precautionary principle, damages children's brains, and is not needed for even a single natural bodily function.

I hope this interview with Dr Dickson helps all of us evaluate water fluorination and make sound decisions regarding our health, including our children's teeth and brains. I hope you will then inquire as to whether or not flourosilicic acid is added to your town's drinking water, and speak with your elected officials to help all of us make the best decisions for our children and ourselves.
