Who Is Barry Duffield?

Barry Duffield is an Australian actor, producer, scriptwriter, born in Feb.28, 1962 in Billingham, UK and living in Auckland, New Zealand.

He is mostly known for his portrayal of "Lugo" in the Starz television series Spartacus.

Barry Duffield's COVID-19 Vaccine Injury Story

Barry had no issues with his 1st COVID-19 vaccine, he is a competitive bodybuilder who continued training daily after his 1st jab.

His COVID-19 vaccine injury started with the 2nd COVID-19 vaccine.

The following is an interview with Liz Gunn (31 min total, vaccine injury is from 5:00 to 23:00).

[Click here to view the video](#)

[His Pfizer mRNA injuries](#), which started within 12-24 hours of 2nd jab include:

- Cardiac – leg swelling, myocarditis, cardiomyopathy, heart palpitations
- neurological – chronic fatigue, arm and hand tremors, crawling skin, headaches
- psychiatric – depression, panic attacks, suicide attempt

Although he was initially put on medications for Parkinson's Disease (Sinemet), his side effects were so severe, Barry describes it as "I didn't know who I was" and had to stop taking them.

This led to a suicide attempt by hanging that he doesn't remember.

He is currently trying some alternative treatments (in addition to working out every day):

- Ivermectin
- Ozone therapy
- he is seeing a kinesiologist

My Take...

Actor Barry Duffield describes everything that is wrong with medicine today.

To this day, not a single doctor will acknowledge his Pfizer mRNA vaccine injuries and he is constantly being misdiagnosed and gaslit.

I found it interesting that his cardiologist was angry and frustrated but cannot bring himself to see the Pfizer mRNA vaccine for the fraud and the harmful product that it is.

Barry has a vaccine injury syndrome, that in Europe is diagnosed as "Post COVID-19 Vaccine Syndrome".

This is a cluster of injuries that often involve cardiac issues and neurological issues and is extremely difficult to treat.

He had heart inflammation and injury (myocarditis, heart failure), which led to his leg swelling, palpitations, and interestingly this is apparently improving.

He also had neurological injuries the most obvious being his uncontrollable left hand and arm tremor, skin crawling sensations, chronic fatigue and panic attacks.

UK Triathlete Roz McGinty has an almost identical cluster of cardiac and neurological injuries, which makes me think there is a common underlying mechanism. [I documented Roz McGinty's injuries here.](#)

I don't know if Barry has tried any COVID-19 vaccine spike detox nutraceuticals such as Nattokinase, Bromelain, Quercetin, Olive Leaf, Black Seed (Nigella Sativa), NAC, Curcumin, etc.

I hope Barry continues to share his Pfizer COVID-19 vaccine injury journey, as he will undoubtedly help thousands who are suffering from similar injuries.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
