

Three Canadians Doctors Died at Same Hospital in Ontario

All three were anesthesiologists in their 50s (a statistical impossibility)

Scott MORRISON

May 22, 2024.

Dr. Scott Wilson

Sault Ste. Marie, Ontario

July 29, 1966 - March 28, 2023

Dr. Robin HARWOOD

December 13, 1967 - May 9, 2023

Dr. Scott Morrison died May 22, 2024 at age 56

Dr. Robin Harwood died May 9, 2023 at age 55

Dr. Scott Wilson died March 28, 2023 at age 56

All three worked at the same Sault Area Hospital in Ontario, Canada.

[NEWS](#): Hospital community mourning death of 'fantastic' anesthetist

'We all feel like we've lost a friend': Dr. Scott Morrison died suddenly last week at the age of 56, the third Sault Area Hospital anesthetist to pass away in the last 13 months

[Darren Taylor](#), May 27, 2024 9:10 PM

Sault Area Hospital staff are mourning the death of Dr. Scott Morrison.

The anesthesiologist [died suddenly](#) last Wednesday at the age of 56.

Morrison's death comes as a shock.

"He was certainly active. He swam regularly, he did paddle board sports. It was just out of the blue," said Dr. Phil Dopp, SAH chief of anesthesia, in a phone interview with *SooToday*.

Morrison had practiced as a full-time anesthetist at SAH since 2014.

"Everybody was shocked. He was 56 and he was well. People had seen him the day before and were talking to him. It's just shocking. It's unbelievable," Dopp said.

Morrison was popular with SAH staff.

"He was a lot of fun. He got along well with everybody. He was friendly. I got a call from one of his students that we had 10 years ago saying: 'Oh my gosh, I just heard. Dr. Morrison kept in touch with me.' He certainly made lots of connections with the people he worked with and maintained those relationships," Dopp said.

Morrison's expertise was appreciated by both surgeons and patients.

"He provided excellent anesthesia care. The patients liked him. His knowledge was fantastic. The surgeons routinely said: 'Scott gave such a great anesthetic.' He was professional with his patients. People were always very happy when they had him. He had a very good demeanour. Obviously the time right before surgery is a stressful period of time for patients and he was able to put people at ease. We have two minutes to gain their trust (before going into the operating room), to put them at ease, and he did a great job at that," Dopp said.

Morrison is the third SAH anesthetist to die in the past 13 months.

Dr. Robin Harwood died of cancer May 9, 2023 at the age of 55.

Dr. Scott Wilson's death at ARCH was announced in April 2023.

"That's three people in their 50s in the last 13 months. To lose three in just over a year is statistically abnormal," Dopp said.

"To think that another anesthetist in Sault Ste. Marie passed away at a young age — without being sick — everybody was shocked and saddened. We're a close knit group in the operating room. We all feel like we've lost a friend."

Morrison's death reduces the number of anesthetists at SAH down to six, five of them full time.

“Ideally we’d have eight or nine people,” Dopp said.

Dopp said SAH continues to do its best to keep up with the surgical workload with the help of locums.

“It’s a challenge. You need an anesthetist for every OR, so if you don’t have them you just can’t run an OR. Given that we were short for the last two years because my two other colleagues had cancer and they were off for about a year before they passed away, we developed a great locum pool in the last couple of years. We’ve probably had about 15 locums, with eight to 10 coming fairly regularly. We’ve had to cancel very few ORs. We plan to run four operating rooms per day and we’ve had to cancel very few operating rooms.”

SAH has moved quickly to adapt following Morrison’s death.

“After Dr. Morrison I was able to get somebody to cover these next two weeks and throughout the summer it looks like we’re going to be able to cover most of his weeks. Right now it doesn’t look like we’re going to impact in a negative way but it’s always up in the air because you’re hoping you find a locum for this week or that week,” Dopp said.

SAH continues its recruitment efforts in the search for more anesthetists.

“We’ve been recruiting for the last two years. There is someone starting at the end of June. We were getting very close to being full complement but now we’re going to be short again. There are some people interested but haven’t committed to moving to the Sault yet. Certainly we’re going to continue working with the Recruitment and Retention Committee to see what they can do to help us,” Dopp said.

“We’re very sad about the untimely passing of Dr. Scott Morrison. Physicians and staff sorely miss him. We’re all grieving the loss,” said Dr. John Heintzman, SAH chief of staff at Monday’s SAH board meeting.

Morrison’s obituary was published by *SooToday* May 24 and can be seen [here](#).

My Take...

The Canadian Medical Association has been covering up the sudden deaths of COVID-19 mRNA Vaccinated Canadian doctors since my first letter to them on Sep. 3, 2022.

Dr. William Makis MD, FRCPC

September 3, 2022

Canadian Medical Association (CMA)
1410 Blair Towers Place, Suite 500
Ottawa, ON, K1J 9B9

Dear CMA Presidents **Dr. Alike Lafontaine** (2022-23) and **Dr. Katharine Smart** (2021-22)

Re: Sudden deaths of 32 young Canadian doctors since rollout of COVID-19 vaccines

CMA's Mission Statement is: *"Empowering and caring for patients"*. CMA's Vision Statement is: *"A vibrant profession and a healthy population"*. Since the rollout of COVID-19 Vaccines in Canada starting in December 2020, CMA has aggressively and unethically promoted the use of experimental COVID-19 Vaccines in populations where risks of serious vaccine injury far outweighed any potential benefits (including children of all ages, teens, pregnant women, healthy adults < age 70).

CMA also supported illegal and unscientific COVID-19 Vaccine mandates that were forced upon Canada's 92,000 doctors by corrupt health bureaucrats. CMA did so in violation of its own **CMA Code of Ethics**, and both of you participated in these ethics violations. You betrayed not only your physician members but the Canadian public that CMA serves. This is unprecedented in CMA's 155-year history.

I am attaching photos and information of 32 young Canadian doctors who died suddenly and unexpectedly in the past 16 months, all of whom were double, triple or quadruple COVID-19 vaccinated. Each of these deaths is highly suspicious for COVID-19 Vaccine Injury, as these previously healthy doctors died suddenly while engaging in regular physical activity, died unexpectedly in their sleep, suffered heart attacks, strokes, unusual accidents, or developed sudden onset aggressive cancers.

Pfizer and Moderna may not be legally liable for their defective pharmaceutical products, but in publicly promoting their forceful use on Canada's doctors, you are both legally liable, and so is CMA.

You cannot stay silent while illegally mandated COVID-19 Vaccines may be killing dozens of young Canadian doctors and putting thousands of doctors at high risk of severe injury and death. I am urging you to remember your ethics and Oath, and use your platform as Presidents of CMA to publicly call for the immediate termination of all COVID-19 Vaccine mandates in Canada's healthcare, and call for urgent Investigations and Public Inquiries into what is killing fully COVID-19 vaccinated young Canadian doctors.

Thank you,

Dr. William Makis MD, FRCPC

October 15, 2022

Canadian Medical Association (CMA)
1410 Blair Towers Place, Suite 500
Ottawa, ON, K1J 9B9

Dear CMA Presidents Dr. Alike Lafontaine (2022-23) and Dr. Katharine Smart (2021-22)

Re: Sudden deaths of 80 young Canadian doctors since rollout of COVID-19 vaccines

On September 3, 2022, I wrote you a letter regarding the sudden and unexpected deaths of 32 young Canadian doctors since the rollout of COVID-19 vaccines, and I raised concerns about COVID-19 vaccines and vaccine mandates contributing to these sudden deaths. The letter went viral on social media, it was viewed by millions of people worldwide, was translated into dozens of languages, and became the topic of numerous podcasts, media interviews, internet videos and news articles.

There has been a tremendous interest worldwide into what is killing Canada's fully COVID-19 vaccinated young doctors. Unfortunately, Canada's healthcare leaders including CMA, do not share this interest. Both of you failed or refused to respond to my letter, and you also failed or refused to respond to inquiries made by American philanthropist Mr. Steve Kirsch, as well as inquiries made by journalists.

I am now providing you an update with information about **80 young Canadian doctors who died suddenly or unexpectedly since the rollout of COVID-19 vaccines**. Four more doctors have died since my previous letter, and these unexpected deaths are accelerating. You cannot continue to ignore this.

My team has assembled a database of 1638 Canadian doctor deaths during the period 2019-2022, with 972 of them from CMA's own website. Our preliminary analysis of this extensive data suggests that Canadian doctor deaths under age 50 in 2022 will be 2-fold higher compared to the 2019-2020 average. Shockingly, Canadian doctor deaths under age 40 are already 5-fold higher in 2022 compared to the 2019-2020 average, and Canadian doctor deaths under age 30 are 8-fold higher!

McMaster University recently announced the sudden deaths of 3 young fully COVID vaccinated medical residents during the summer of 2022, which is unprecedented. All Canadian medical students and residents were forced into unscientific, unethical, cruel and harmful COVID-19 vaccine mandates.

I implore you again to remember your Hippocratic Oath and your own *CMA Code of Ethics*, and call for an immediate halt to all COVID-19 vaccine mandates in Canadian healthcare.

Thank you,

Dr. William Makis MD, FRCPC

After my October 15, 2022 letter, the CMA proceeded to delete all Canadian doctor deaths from 2021 and prior, from their "In Memoriam" website (I believe this was done so Canadians could not compare 2022 deaths to prior years).

At the start of 2023 they deleted all their 2022 entries as well.

They would end up deleting over 1190 Canadian Doctor death entries from their website (we downloaded them all). I documented this in a 3 hour testimony to the National Citizen's Inquiry.

In 2021 Canadian doctors had excess mortality of +33%, and by 2022 it rose to +53%.

Other Statistical Anomalies for Canadian Docs:

2022 – McMaster University, Hamilton, Ontario, Canada – three medical residents died in the summer of 2022.

To my knowledge, I am not aware of any other Medical School losing three residents to sudden death in such a short period of time.

		
Died: June 29, 2022 Dr. Satyan Choudhuri Age: 25 Hamilton, ON (McMaster U) Family medicine resident 1st yr Died suddenly	Died: July 28, 2022 Dr. Candace Nayman Age: 27 Hamilton, ON (McMaster U) Pediatrics resident, triathlete Collapsed swimming, died after	Died: Sep 18, 2022 Dr. Matthew Foss Age: 32 Hamilton, ON (McMaster U) Anesthesiology resident 5th yr Rapid cancer – HD lymphoma

2022 – Trillium Hospital, Mississauga, Ontario – four doctors from the same Hospital died of Cancer within a span of 3 weeks.

			
Died: July 19, 2022 Dr. Jakub T. Sawicki Age: 36 Mississauga, ON (Trillium) Family physician Rapid cancer gastric (St.4) < 1yr	Died: July 18, 2022 Dr. Stephen W. McKenzie Age: 68 Mississauga, ON (Trillium) Neurologist Cancer, details unknown	Died: July 17, 2022 Dr. Lorne E. Segall Age: 49 Mississauga, ON (Trillium) ENT specialist Rapid cancer lung (St.4) < 1 year	Died: June 26, 2022 Dr. Maselle Virey Age: 68 Mississauga, ON (Trillium) Psychiatrist Died suddenly, rapid cancer

These types of statistical anomalies should not be mathematically possible.

To me, this hints at the possibility that the deaths are going to get much worse.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.

—Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. –Edward Curtin
