[Feb. 2024](#) – Grapevine, TX – Tiffany Branum was diagnosed with brain cancer. Months later her husband Scott Branum was diagnosed with brain cancer.

On October 4 2023, Tiffany started feeling bad.

So her husband took her to a hospital, where she was diagnosed with a brain tumor. It was cancerous.

Days later, she underwent surgery to have it removed.

Tiffany and Scott were able to make it their son's last college hockey game.

Then, just days after that, Scott had to be rushed to a hospital.

"All of sudden, devastating right. Scott had a seizure at home and was rushed to the hospital and they discovered he had a tumor. I mean, it's unreal," Jones said.

Scott underwent surgery last Thursday. Jones said doctors were able to remove 90% of the tumor.

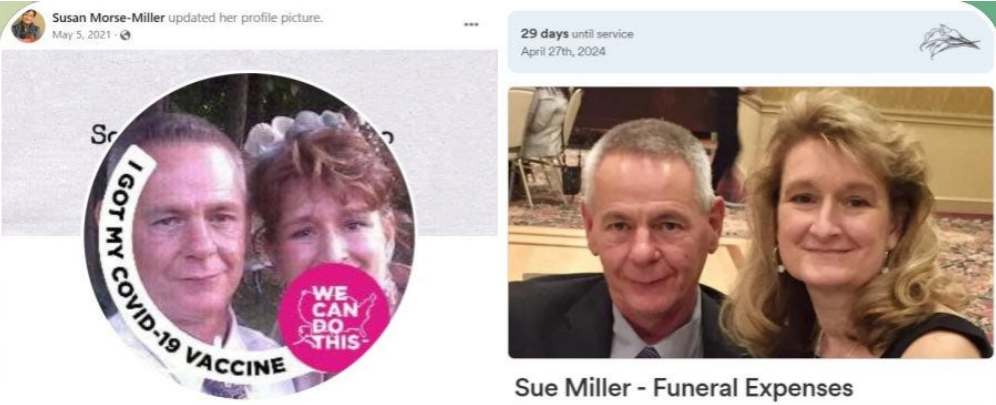

He's back home resting. The family is waiting on the pathology results to determine his course of treatment.

Since the rollout of COVID-19 mRNA Vaccines, couples are coming down with cancer. This is no longer a rare phenomenon, and pharmaceutical companies are positioning themselves to profit from it.

March 20, 2024 - 58 year old Susan Morse Miller, fully COVID-19 Vaccinated, died after a battle with cancer. Her husband is also battling cancer.

Susan Morse Miller, 58, of Newtown, died on March 20, 2024, following a battle with cancer.

"Funds raised will directly benefit Keith, who is also fighting his own battle against cancer, helping to alleviate some of the financial strain associated with funeral and medical expenses"

Feb. 28, 2024 - MLB Pitcher Tim Wakefield died of brain cancer on Oct. 1, 2023. Diagnosis to death: weeks. His wife, Stacy Wakefield died of pancreatic cancer on Feb. 28, 2024. Diagnosis to death: 6-12 months

Stacy Wakefield, the widow of the late Major League Baseball player, Tim Wakefield, has died, the Boston Red Sox has confirmed. Her death comes five months after the pitcher died in October 2023. | 📷: Getty

Oct 2, 2023 — It is unclear what type of brain tumor the Red Sox Hall of Famer was diagnosed with just weeks before his death at age 57.

Death [edit]

On October 1, 2023, Wakefield died at his home in Massachusetts of a seizure resulting from [brain cancer](#). He was 57.^{[66][62]} The cancer diagnosis had been revealed days earlier by [Curt Schilling](#), Wakefield's former Red Sox teammate, stirring controversy because the release was not authorized by Wakefield or his family.^{[62][67]}

On February 28, 2024, his widow, Stacy Wakefield, died from [pancreatic cancer](#).^[68]

Tim Wakefield died in October at age 57. His wife was 53 when she died, [according](#)

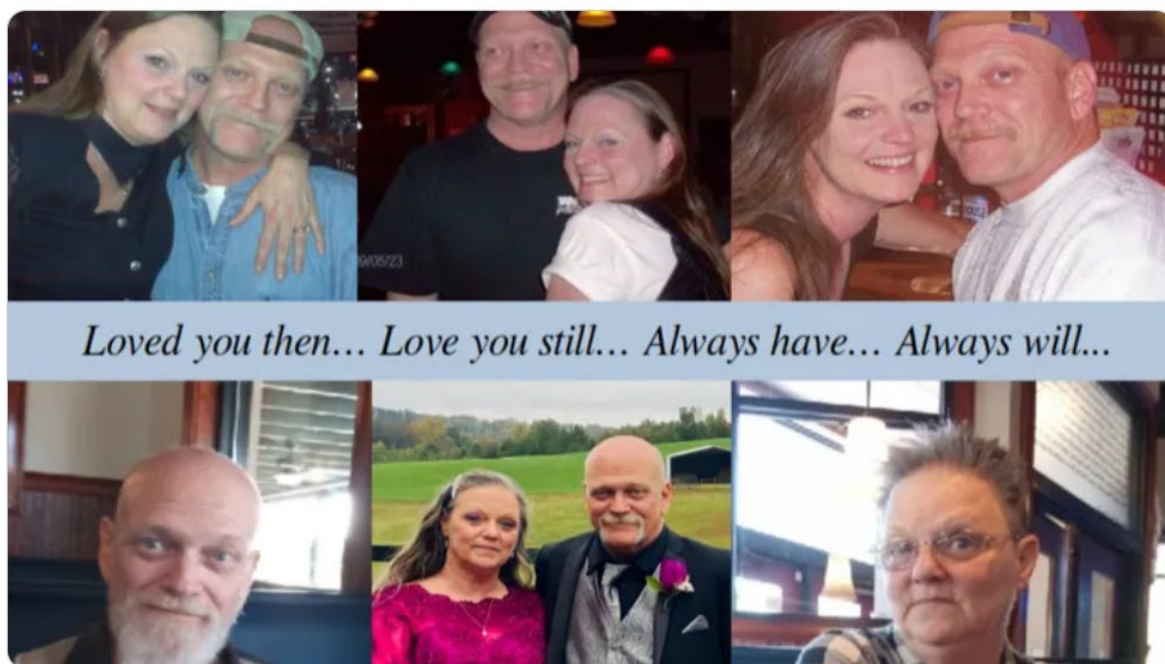

He continued: "[Recently](#) Tim was diagnosed with a very serious, very aggressive form of brain cancer."

Schilling also shared that Stacy has cancer as well.

"Tim's wife Stacy is one of the sweetest women you'll ever meet, is very sick with pancreatic cancer and my wife has talked with her and they're communicating and they're going through an incredibly difficult time with Stacy, and I wanted them to know that we're obviously all thinking of them and praying for her."

Feb. 2024 – Millen, GA – Keith & Allison Wise were both diagnosed with Stage 3 cancers at virtually the same time, in August 2022.

Help Keith & Allison Wise

Loved you then... Love you still... Always have... Always will...

Meet Keith and Allison Wise.

Two years ago this couple was diagnosed with stage 3 cancers at virtually the same time.

Allison is 65, newly diabetic (due to the RCC) with high blood pressure and is visually impaired. In August of 2022 she was diagnosed with Renal Cell Carcinoma (RCC) which required removal of her right kidney followed by a year of immunotherapy with Keytruda to treat the cancer but she is left with stage 3 kidney disease and needs specific care under a Nephrologist (Kidney Specialist).

Unable to drive or work she has been denied disability because she is married.

Keith is 62, has been through Chemo/Radiation (30 sessions, 5 days a week for 6 weeks) treatments and 4 and a half months of additional Chemotherapy to treat stage 3 Colo-rectal cancer.

Dec. 4, 2023 - 52 year old journalist Susan Ashworth Bader collapsed & died suddenly (she had breast cancer) on Dec. 4, 2023. Her husband, 51 year old Rob Bader died after a 5 month battle with Stage 4 Colon cancer on Mar. 19, 2023.

Susie Ashworth & Rob Bader Memorial Fund

Jennifer Ashworth is organizing this fundraiser on behalf of Jennifer Ashworth.

Donation protected

Early this morning, December 4, my sister Susie died. She collapsed and EMTs were unable to revive her.

Unbeknownst to most people, Susie had a diagnosis of breast cancer right before her husband Rob passed away. She underwent a single mastectomy and radiation. On top of all that, she had been struggling with interstitial cystitis for years.

Created October 19th, 2022 ·  [Funerals & Memorials](#)

Rob has been diagnosed with Stage 4 metastatic colorectal cancer. His family is all banding together to help, but the medical expenses are piling up fast. The family is considering an alternative treatment as traditional chemotherapy has proven ineffective. We are hoping to raise funds to cover the cost since this treatment is not covered by insurance. Anything you can do to help is greatly appreciated!

Update 3/19: It is the saddest duty of my life to report that Rob has passed away. He slept through the night peacefully, and simply stopped breathing at 8:00 am. His father was able to make it in time from Baltimore, as did his father-in-law from Southern California. I know his many, many friends and colleagues are devastated at this news.

My father went to visit Rob and Susie on the anniversary of Rob's death, March 19. When he returned the next day, Susie's name and dates had been added beneath Rob's. It is eerily similar to the way Susie just "happened" to be visiting Rob's grave on the day his headstone was first placed. I am especially fond of my input to the headstone-- "Rob" and "Susie," the names both of them went by for most of their lives, was added to the back, above "Married September 25, 1999."

You would think that, as administrator of her estate, I would be used to seeing my sister's name in the "deceased" column. But there is something about seeing her name, literally carved in stone, that breaks me.

Susan Ashworth Bader

[Share This Obituary](#)

Susan Ashworth Bader, freelance journalist and former Editor-in-Chief of TV Technology, a broadcast industry trade publication, died suddenly on December 4 at her

home in Oakland, CA. She was 52. Compassionate and curious, Susie, as she was known by family, friends and colleagues, was drawn to reporting at an early age. With no school newspaper at Serrano High School, she instead worked on the yearbook. At UC Riverside, she covered campus events from basketball to student body governance meetings for the Highlander. After graduation, she was accepted at the Medill School of Journalism at Northwestern University to obtain her Masters Degree. There it was crystallized in her, the core journalistic standards of accuracy, transparency and accountability, which she fiercely held herself and other journalists to throughout her career. During her last quarter at school, with Montana, her cat in tow, Susie moved to Washington, D.C., to continue her studies through assignments covering breaking news events in the nation's capital. She met her future husband, Rob Bader, in Gaithersburg, MD. She first began working for TV Technology where she reported on advances in the field of broadcast television, from the newest flying cameras filming the X-Games to virtual reality TV news studios and even "how that elusive yellow first-down line appears on a football field". Susie and Rob were married in her hometown of Wrightwood, CA, in 1999. They moved to the Bay Area when Rob was accepted in law school at UC College of the Law in San Francisco. Susie worked for the housing publication Hanley Wood as

Robert Bader Obituary

Robert Brett Bader passed away surrounded by his family on March 19, 2023, after a very difficult fight with cancer. As the only child of Walter Bader and Deborah Chadima, Rob was born in Baltimore, Md., and attended Gaithersburg High School where he met his future wife, Susie Ashworth, when they were 15. They dated, went their separate ways, and reconnected after Rob graduated with a BA in Political Science from Virginia Tech and Susie finished her Journalism Masters at Northwestern University. Rob and Susie married in 1999 and have three children, Jackson, Nate and Charlotte. Rob earned his JD at UC Hastings College of the Law and practiced at Pillsbury Winthrop, Goodwin Procter and SRC. Rob's best memories as an attorney involved serving as a mentor to associates at his law firms. Rob was a history buff, with a special interest in WWI, WWII and the American Civil War. He loved reading history, particularly books about the founding fathers and Civil War generals. His general knowledge served him well when he tried out and was invited to appear on Jeopardy,

Nov. 2023 – Young couple both diagnosed with cancer in 2023 while having a baby. Matt Lambert, age 42, diagnosed with stomach cancer Feb. 2023; Laura Lambert, age 38, diagnosed with lymphoma (15cm mass in her chest Stage 3) Nov. 2023.

Christmas cancelled for couple who were both diagnosed with cancer the same year they had their first child

Laura started seeing symptoms two months after their baby was born

 Matt and Laura were looking forward to getting married and having their first child in the spring (Collect/PA Real Life)

A pair of newlyweds have said their baby is the 'one shining light' after they were both diagnosed with cancer in the same year their daughter was born. This time last year Matt and Laura Lambert, from Derby, were looking forward to getting married and welcoming their first child in the spring.

But in February their world came crashing down when Matt, who had visited hospital several times over the previous two years with "excruciating" abdominal pains, was diagnosed with a rare type of stomach cancer called neuroendocrine tumours.

The couple, who have been together for 15 years and work in software, did not let the bad news ruin their life plans, and eloped to Las Vegas in March. Two months later their daughter, who they do not wish to name, was born, but after giving birth, Laura kept coughing and experiencing temperatures and night sweats.

She said doctors initially thought these were postpartum symptoms before a chest X-ray in November revealed Laura, 38, had a 15cm mass in her chest cavity which was stage 3 lymphoma – blood cancer. Matt, 42, is scheduled to have an operation to remove his tumours in February, and Laura will start "intensive chemotherapy" before Christmas, but the pair are concerned about losing their home if they can no longer work and cover the mortgage repayments.

Sep. 2023 – Cleveland, OH – Shane Gray was diagnosed with advanced stage testicular cancer in Feb. 2023. Months later, his wife Morgan Gray was diagnosed with triple negative breast cancer in July 2023.

Both husband and wife diagnosed with cancer less than year after marriage

The heartbroken friend, who had set the couple up in the first place, described what should have been one of the happiest years of the Cleveland couples life as 'brutal'

By **Charlie Jones**, News Reporter
11:50, 14 Sep 2023 | UPDATED 19:18, 14 SEP 2023

A couple is facing a "brutal year" after both being diagnosed with cancer within six months of being married.

The Cleveland pair, Morgan and Shane Gray, happily married in October 2022 and "couldn't wait to begin their lives as newlyweds," according to a fundraiser set up by a [close friend, Kelli Kachmar](#).

Just months later, in February this year, Shane was **diagnosed with testicular cancer** that had spread to his surrounding lymph nodes. This kicked off extensive rounds of treatment including surgery and 21 chemo infusions. Thankfully he was told in June that he was cancer free.

The joy was short lived because just a few "short weeks later", Morgan was diagnosed with triple negative breast cancer, a type of breast cancer that develops more often in women under 40. The diagnosis was made during a breast examination.

Both were diagnosed with cancer within a year of getting married (Image: Getty Images)

The fundraiser states: "While the initial thought was that everything was fine, an ultrasound and biopsy were performed to rule anything out. The finding was yet another blow to the Gray family: Morgan had triple negative breast cancer."

Apr. 2023 – Beaumont, TX – John and Alexis Ferguson are both fighting Stage 4 cancer at the same time.

Dec. 2022 - UK - James Jefferson-Loveday was diagnosed with Hodgkin Lymphoma in Dec. 2021, months later his wife Bethany was diagnosed with high grade Non-Hodgkin Lymphoma while 21 weeks pregnant.

Baby Heidi was born healthy with no adverse affects from the chemotherapy, the hospital trust said

'Miracle' baby born to Evesham couple diagnosed with cancer

16 December 2022

Share

A baby born to a couple who both had chemotherapy during the pregnancy has been described as a miracle.

James Jefferson-Loveday was diagnosed with Hodgkin lymphoma last December, just months before his wife Bethany was diagnosed with a similar cancer at 21 weeks pregnant.

His diagnosis had led to the couple from Worcestershire trying for a baby.

After treatment, baby Heidi was born healthy, while both parents are now in remission, doctors say.

Dr Salim Shafeek, who treated the couple from Evesham, said: "The combination of being pregnant and having high-grade non-Hodgkin lymphoma is exceptionally rare, and Bethany is the first case of this I've treated in my 25 years as a consultant haematologist."

Mrs Jefferson-Loveday began feeling unwell during her first trimester, while her husband was still undergoing chemotherapy treatment for his lymphoma.

She put how she was feeling down to her pregnancy and believed a lump she had found was a cyst.

Eventually seeking medical help, she was then told the devastating news.

"I will never forget the moment I was given my diagnosis," Mrs Jefferson-Loveday said.

"I remember questioning how this was possible as my husband was undergoing treatment for Hodgkin lymphoma at the time."

She talked through all treatment options with a consultant obstetrician at Worcestershire Royal Hospital before enduring an intense course of six cycles of chemotherapy, the hospital trust said.

Dr Shafeek said they could not use stronger treatment, or delay chemotherapy, which had to be finished by 35 weeks to enable her to recover enough for childbirth.

"After every chemotherapy I felt a sense of celebration that I had another one under my belt and was closer to having my baby," she said.

July 2022 – 43 year old Shauna Ellis was diagnosed with breast cancer in May 2021. Her husband, 47 year old Jason Ellis was diagnosed with Stage 3 Colon Cancer in Feb. 2022.

Jason and Shauna Ellis received cancer diagnoses within a year of each other. Jason and Shauna Ellis

Shauna Ellis underwent her last surgery to treat breast cancer this Valentine's Day.

Ellis, 43, had been diagnosed with breast cancer in May 2021. Her husband Jason and two teenage kids supported her as she underwent a double mastectomy to remove both breasts.

But Shauna's final surgery did not end the Ellis family's battle with cancer. On February 16 doctors found a mass in Jason's, 47, abdomen that turned out to be stage 3 colon cancer.

In one year, Jason and Shauna Ellis went from being the self-described life of the party with plans to renew their vows in Jamaica to bedridden and weak from surgeries and chemotherapy.

"It's just a shock, it was like time stood still for both of us," Shauna Ellis told Insider. "Because literally I'm still recovering. And now he has to endure chemotherapy."

March 2022 – Michigan couple diagnosed with cancer within days of each other. Mariah

Nelesen, age 23, was diagnosed with Ovarian Cancer in Jan. 2022. Just 8 days later, her husband, Clay Sleek, age 24, was diagnosed with Acute Myeloid Leukemia.

My Take...

It is important to remember that approximately 70% of the world population has received at least one dose of COVID-19 Vaccine.

Coronavirus (COVID-19) Vaccinations

[Home](#) > [Coronavirus](#) > [Vaccinations](#)

70.6% of the world population has received at least one dose of a COVID-19 vaccine.

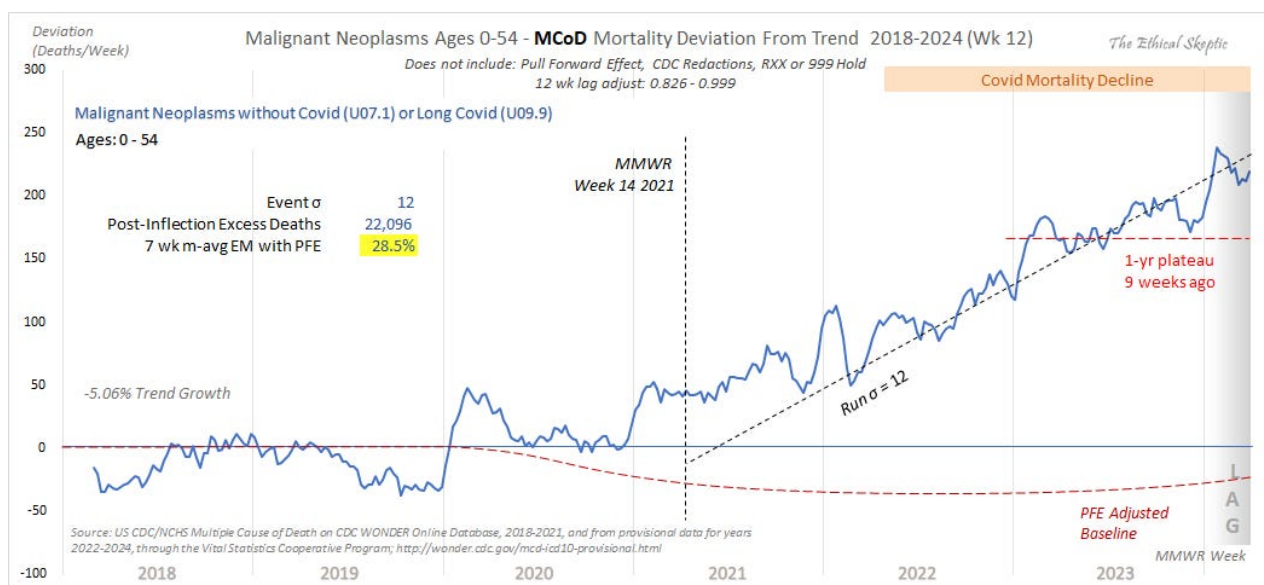

13.57 billion doses have been administered globally, and **10,292** are now administered each day.

32.7% of people in low-income countries have received at least one dose.

Pfizer and Moderna COVID-19 mRNA Vaccines cause very aggressive cancers called “Turbo Cancer”.

Ethical Skeptic on X has put out new data today (April 4, 2024) showing that Cancer mortality in the United States has hit a new record high after being fairly flat over the past year. This is a very concerning development.

According to Pfizer CEO Albert Bourla, 1 in 3 people will get cancer. He seems quite certain about this.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of

innocent people who have no clue. His conclusions are evidenced by renown scientists.
—Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. –Edward Curtin
