38-year-old UK content creator Jules Fielder developed stage 4 Lung Cancer a few months after two COVID-19 Vaccine Doses

[Nov. 1, 2022](#)

- Jules Fielder is a 39-year-old mum of one from Hastings who is living with incurable lung cancer and campaigns for better awareness of the disease.

Juliet Fielder is feeling proud.

8 Jan 2021 · 🌐

Ready now for round 2..off I go to support another hospital 💪

👍❤️ 75

At 38, Jules doesn't look like someone who would be diagnosed with lung cancer and she believe this, coupled with her non-respiratory symptoms, meant she wasn't diagnosed as quickly as she could have been. She is sharing her experience to help others avoid similar delays.

"I think people would look at me and never believe I have stage 4 lung cancer which has spread to three points in my spine and pelvis but this is my reality.

"I was diagnosed on 5th November after a series of what I now know to be lung cancer symptoms. I had been suffering from back ache, shoulder pain and then developed a lump in my neck. I was totally unaware that any of these were signs of lung cancer and my doctors didn't piece it together either.

"My backache was put down to sciatica. My shoulder pain was diagnosed as tennis elbow - over the phone - whilst the lump in my neck was dismissed as a cyst or swollen gland that people get when they are run down. I wasn't happy with this so pushed back and was referred to an ear, nose and throat specialist and this was how I finally started on the path to diagnosis.

"The ENT doctor sent me for an ultrasound and they told me they were taking biopsies. That was when alarm bells started to ring.

"My worst fears were soon confirmed and I was diagnosed with lung cancer. At that point,

we didn't really know what was going on. The person who delivered the news was not a lung cancer specialist and so couldn't answer any of our questions. I was left fearing the worst.

As a mother, you just think of all the worst scenarios. I thought I was going to die and how was I going to tell my son. It just doesn't feel real. You just keep asking yourself 'Is this actually happening to me?'

JULES WAS DIAGNOSED WITH LUNG CANCER AGED 38

"Three days later, I had a phone call to tell me the scans showed it had spread to my spine and pelvis. We were completely devastated and so scared. We were still waiting on the results of the biopsies so I still didn't have a treatment plan. All those worst case scenarios were feeling like they were coming true. All we knew for sure was that it was stage 4 and it felt like the end of the road.

"But then my treatment plan came in. I met my consultant and asked 'Can anything be done?' and he said yes! He told me about a targeted therapy that was showing great success, especially in the younger generation, by basically putting my cancer to sleep. And that is what is happening.

"Each day, I take this one little pill - I call it my magic medicine - and every scan since has shown my cancer is stable.

"It doesn't come without side effects. I think that's the price you pay for having a drug working so invasively in your system. I have mouthwashes constantly. My skin is cracked and dry because all the oil has been extracted from my body. I have diarrhea, sickness, loss of appetite and fatigue. The list goes on but that's where your lung nurse comes in. She will make everything more manageable.

I'm now approaching a year since my diagnosis and I have come to peace with it. I do not live with cancer; my cancer lives with me. I am the one in control.

"However, I do still feel angry. I'm not a medical professional so I couldn't have known that my body was sending out a message. I believe those little jigsaw pieces should have been picked up by a medical professional. I should have been scanned sooner and then my lung cancer could have been found out at a lower stage instead of stage four.

"I think lung cancer is very much associated to men. It has been largely thought of a manly illness, maybe someone who was a heavy smoker, or a man that worked in the asbestos industry.

"I want to break that stigma. And I will do everything in my power to do just that."

Turbo Lung Cancer in Under 40

Thailand - Dr. Krittai Thanasombatkul was diagnosed with Stage 4 Lung Cancer in Oct. 2022 died on Dec. 5, 2023.

Pongpan Suriyapat is 🙏 feeling emotional with **Sukontip Fon Nakasem** at **WarinLab**.
5 Dec · Bangkok, Thailand · 🌐

I'm deeply sorry to hear about the passing of Dr. Kritthai from the page **สู้ด้วย**. He was a dedicated doctor in Chiang Mai who tragically succumbed to lung cancer this morning. Despite his vibrant childhood and athletic pursuits, there were no indications of cancer until he graduated from medical school; his sudden illness highlights the profound impact of severe air pollution, especially PM2.5, in northern Thailand.

As I'm involved in an art exhibition "Polluted Currents" at **WarinLab** Contemporary, his earlier quote on air pollution was also displayed as a part of this exhibition on the second floor of the gallery. We truly appreciate Dr. Kritthai's unwavering commitment to battling cancer until the very end of his life. His story serves as a poignant reminder for us and society to take this issue seriously, making it a national and global concern. He leaves behind a legacy that urges us to raise awareness and address this critical problem.

A DOCTOR WHO DIED OF LUNG CANCER AWAKENS PEOPLE TO FIGHT PM2.5

By **Khaosod English** · December 6, 2023 9:18 pm

The Faculty of Medicine Chiang Mai University Facebook page posted a message and photos of a merit-making event for Dr. Kritthai Thanasombatkul, who died of lung cancer at the age of 29.

CHIANG MAI – Kritthai Thanasombatkul, a medical doctor who became a best-selling author about maintaining his fighting spirit and the meaning of life despite having had last-stage lung cancer since October 2022 and passing away on December 5, donated his body before he died to the Faculty of Medicine at Chiang Mai University.

On December 6, the **Faculty of Medicine Chiang Mai University** Facebook page released a message and photos of a merit-making event for Dr. Kritthai, with monks praying and praising his body donation. Dr. Kritthai's father thanked the medical staff and said the family was pleased to contribute the body for further study.

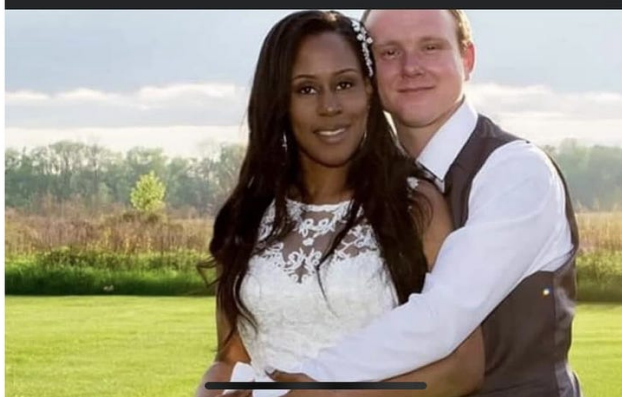

Nov. 30, 2023 – TURBO CANCER – NY – 40 year old Sophia Sheffer was diagnosed with Stage 4 Lung cancer in Oct. 2023 & died on Nov. 30, 2023. Dx to death: 1 month.

As some may have heard, my beautiful 40yr old cousin Sophia Sheffer was unexpectedly diagnosed with stage 4 lung cancer in October 2023! We thought she had more time but after a short but VERY courageous fight, she lost her battle with cancer yesterday and joined God in Heaven! I know HE welcomed her with open arms and she has reunited with many of our loved ones!

Please come join us in celebrating her life:
Saturday December 9th 2023
Bartolomeo & Perotto Funeral Home
1411 Vintage Lane Greece, NY 14626
from 2-4pm!

We love her and will miss her tremendously! Please keep her husband Michael Sheffer, her 4 kids, her parents and all of her extended family in your prayers 🙏

Love you Sophia! My 9th angel ❤️💔🙏🕊️
#FKCancer

Sophia Alexis Sheffer was born to Lambert and Geraldine Blake on April 18, 1983 in Rochester, NY. She entered eternal rest on November 30, 2023, after a short but courageous battle with lung cancer.

Sophia graduated from the School of the Arts in Rochester, NY. She was employed at Lifetime Assistance and was also a professional homemaker. Sophia was a selfless, dedicated mother of four children with a beautiful spirit and personality. She loved gardening, decorating her home during the holidays, reading books, and doing creative writing. Another of Sophia's favorite things to do was visit the summer festivals in Rochester and the New York State Fair, enjoying the amazing food choices.

Sophia A. Sheffer

Nov. 5, 2023 - 32 year old Bonginkosi Ntuli, South African professional soccer player was diagnosed with Stage 4 Lung cancer shortly before his unexpected death on Nov. 5, 2023.

Bonginkosi "Bongi" Ntuli has died.
Image: Twitter

Died: Nov.5, 2023

HOT NEWS FROM SOCIAL MEDIA

The untimely death of soccer player Bonginkosi "Bongi" Ntuli has sent shockwaves on social media.

This after a statement shared by AmaZulu FC confirmed his death on Sunday afternoon.

"It is with a very heavy heart that we inform you of the untimely passing of our beloved centre forward and loyal servant, Bonginkosi Ntuli.

"Ntuli was very recently diagnosed with an aggressive form of cancer which metastasized and ultimately led to his death at the Midlands Medical Centre Private Hospital in Pietermaritzburg this afternoon," read the statement.

Industry colleagues, friends and fans took to social media to pay tribute to the late star.

"We honestly lost one. Condolences to the Ntuli family and Amazulu FC. Our prayers are with you in this difficult time," Teko Modise wrote.

The family of the late AmaZulu Football Club forward Bonginkosi Ntuli is trying to come to terms with his sudden death.

Ntuli passed away on Sunday at the age of 32 from what his club described as an "aggressive form of cancer" shortly after he was diagnosed.

His father Thulani Ntuli said his son died after a short illness the family had initially thought was flu, but which turned out to be lung cancer that was diagnosed at an advanced stage.

"We thought it was just flu but when we realised it was getting worse we took him to hospital in Durban, but they couldn't figure out what was wrong. We decided to take him to another hospital in Pietermaritzburg because this 'flu' was not getting any better. There they discovered he had lung cancer."

"They drew around one litre of water and blood from his lungs which showed it was at an advanced stage. So he died of lung cancer."

He said Bonginkosi's death was a big blow to the family as they had lost a responsible man who would attend to every need as soon as possible.

"We were very dependent on him. I would tell him 'you're the head of this home' because I was looking at his good deeds at home."

Oct. 15, 2023 – Norfolk, UK – 31 year old Jessica Robinson was told she just had wisdom tooth pain. She was then diagnosed with Stage 4 Lung Cancer "and the cancer spread, engulfing her whole left lung as well as her aorta and infusing into her spine". She died 45 days after cancer diagnosis, on Oct. 15, 2023. "Family was told that doctors had not been looking for lung cancer because she was too young."

Family friends described Jessica as

'Strong and passionate' Norfolk mum dies six weeks after cancer diagnosis

Story by Ashlea Hickin • 4mo • 4 min read

A young Norfolk mum has sadly lost her battle with cancer, after originally being told by dentists and GPs that she just had wisdom tooth pain. 31-year-old Jessica Robinson from Titchwell died on October 15 leaving behind her five-year-old daughter, Lilit as well as her loving mother and sister.

Jessica worked at her local primary school, and was about to begin her first year working as a teaching assistant before she became ill. She began to experience what she thought was wisdom tooth pain and attended many dentist and GP appointments with no real diagnosis. At the end of the school summer holidays, Jess was bed bound, in too much pain to move or eat.

One more appointment with a doctor saw her heading to hospital for a chest X-ray where a shadow was found in her lungs. After biopsies and MRI scans, the family were told that she had cancer in her left lung, fluid around her heart and swelling in her brain.

The fluid around her heart continued to grow and caused both chambers on the right side of her heart to collapse. She was sent to Royal Papworth Hospital in Cambridge where 2.5 litres of fluid was drained from her chest. Usually people have around 10-15 millilitres.

The family then received the devastating news that Jessica had stage four inoperable lung cancer. They were told that treatment could give her another 18 months but without it, she would only live for a maximum of six months. Sadly, Jessica never got well enough for treatment and the cancer spread, engulfing her whole left lung as well as her aorta and infusing into her spine. It was 45 days after her diagnosis that she sadly died.

Jessica's sister, Harriet Letzer said; "One of the things that Jessica wanted to do but never got the time to do was raise awareness for the symptoms that she got. It showed up as wisdom tooth pain because it turns out that nerves connect your face and your lungs together. One of the things she wanted to do was raise awareness for it because she spent weeks being bounced from the dentist to the GP with neither of them pressing any further than just her tooth pain."

The family was told that doctors had not been looking for lung cancer as the symptoms presented by Jessica were symptoms that usually present in people much older than her. Harriet said: "Cancer is well known to get anybody at any age whether you're healthy or unhealthy.

"We all carry cancer cells, it's just whether or not they mutate. So being told that she was too young to be looking for it is very frustrating and it makes you angry because you just think 'why aren't we looking for it?' What could have been done if we had been looking for it?"

Oct. 4, 2023 – 36 year old NY Army National Guard Captain Patrick John Cassidy, who was also a rugby player died after 9 month battle with Stage 4 Lung Cancer.

CPT Patrick J. Cassidy

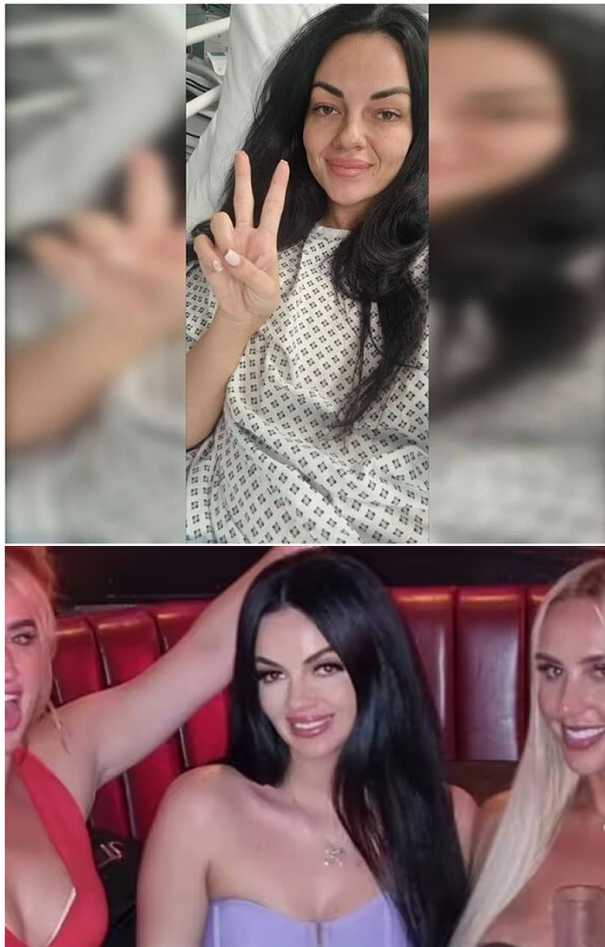

Patrick Cassidy Obituary

CPT Patrick J. Cassidy
October 4, 2023

Captain Patrick John Cassidy, age 36, of Syracuse, died Wednesday, October 4th with his wife and children by his side. Patrick passed away at home after a **nine-month battle with lung cancer**. Patrick is an adored father, beloved husband, cherished son, loyal friend, dependable teammate, and esteemed colleague to many.

Patrick lived in Syracuse with his wife Ariane; sons Ronin and Lorcan, and beloved pets. He was a 2005 graduate of Westhill Schools and was a current member of the Westhill School Board. Patrick graduated from Le Moyne College in 2010, where he studied History, Education, and played rugby. After graduation Patrick enjoyed playing rugby for the Syracuse Chargers, a team he played with for many years. Patrick dedicated himself to serving others and highlighted this desire to serve with his time in the New York Army National Guard. He received many medals and ribbons during his time in the Guard due to his incredible talent. Most recently, Patrick served as the Commander of Headquarters and Headquarters Troop, 2-101 CAV. When he wasn't Captain Cassidy, he worked as a Warehouse Manager for Freight Management

Oct. 1, 2023 - UK - 29 year old Hannah Williams died suddenly on Oct. 1, 2023 just 4 months after being diagnosed with Stage 3 Lung Cancer while she was pregnant. Diagnosis to death: 4 months.

Stoke on Trent Live

Brave cancer-hit mum, 29, dies just 10 days after giving birth

Story by Wesley Holmes & Yasmin Sarwar • 4mo

Tributes have been paid to a courageous cancer-hit mum who strived to do everything in her power to give her unborn baby 'a fighting chance'. Hannah Williams, 29, lost her fight for life on Sunday (October 1) just four months after being diagnosed with stage three lung cancer.

Hannah received the devastating news when she was two months into her pregnancy, and was given the option to terminate the foetus due to the possible effects of chemotherapy. Regardless of doctors warning Hannah that she 'wasn't going to make it', she defied all odds and gave birth to her daughter, Nova, on Thursday, September 21, the [Echo](#) reports.

Tragically, the new mum passed away just 10 days later. Hannah's mum, Anita Williams, posted a statement on Facebook following the death. She wrote: "Hannah showed immeasurable courage and strength throughout her fight, right up until the very end; and in doing so gave the ultimate gift which was to give life to her beautiful, perfect little girl Nova. Nova, a bright star that releases powerful energy.

[Sep. 9, 2023](#) - Ft. Pierce, FL - 40 year old Lindsey Porter is a nurse. She is also a new mom and was just diagnosed with Stage 4 Lung cancer with brain metastases.

Help New Mom Fight Stage 4 Lung Cancer

Britt G is organizing this fundraiser on behalf of Lindsey Porter.

Dear friends, family, and loving supporters,

Britt G

Organizer
Ft. Pierce, FL

I am starting this fund on behalf of my incredible sister, Lindsey Porter.

Lindsey had bad daily headaches for about a month and explained them away as we are prone to do. Finally, she saw the doctor and he ordered an MRI. On Friday, August 4th she received a call from the doctor's office telling her to go to the ER because they see masses in her brain and she needed to get a full body CT Scan. The results came back positive for stage 4 adenocarcinoma in her lung, with metastasis to her brain. The world as we know it came to a halt for her family, and of course, Lindsey can only think of how much her baby needs her and she needs to be here for her.

We have listened to the medical plan which includes brain surgery later this week to remove the large tumor, radiation and chemotherapy. The best drugs available for her type of cancer are relatively new and can be outrageously expensive, even with some insurance coverage. There are large deductibles, and copays, and like most couples, Lindsey and Nigel both need to work. Lindsey was an emergency room nurse for 16 yrs and has since been working as a Trauma Specialist. She was always a wonderful nurse and loved caring for others. She even took a 6 week leave of absence to care for our grandmother in a

September 9th, 2023 by Britt G, Organizer

Since my last update, Lindsey has been referred to Moffitt Cancer Center in Tampa. She has been seen by a thoracic surgeon who plans to remove half of her left lung-the entire left upper lobe after 3-4 rounds of chemo. Surgery will likely be just before Christmas. Due to her age she will be treated very aggressively, which we are all grateful for but it will be a long, difficult road for her. Chemo will begin as soon as she finishes her first cyberknife treatment on her brain, so in about 1-2 weeks. The real fight begins now. She continues to find strength from her miracle baby, Kami as well as family, friends and the many prayers and comforting words.

[Sep. 5, 2023](#) - Glasgow, Scotland - 28 year old Cheryl Robertson was given a Stage 4 Lung Cancer (ALK-positive) Diagnosis in March 2023 and she died six months later. She had no smoking history. The lung cancer spread to both her lungs and lymph nodes.

Cheryl died on September 5 (Image: Glasgow Live)

Aug. 29, 2023 - Aug.29, 2023 - NY - 39 year old Stefanie Frances Lampf Kennedy, a successful real estate lawyer died on Aug. 29, 2023 from a rare, aggressive lung cancer.

Stefanie Kennedy Obituary

"Fiercely Loved Her Family and Friends"

Beloved mother, wife, sister, daughter, friend, and colleague Stefanie Frances Lampf Kennedy of Jersey City, NJ, passed August 29 in New York surrounded by her loving family. The cause was a rare and aggressive form of lung cancer. She was 39 years old.

Stefanie is survived by her devoted husband, Daniel; three beloved children, Eoin (7), Bernadette (4), and Maddax (1); parents Mark and Shelley Lampf; siblings Carolyn Reed (Chris), Sean Lampf (Sherry), and Philip Lampf; father- and mother-in-law Patrick and MaryLou Kennedy; brothers-in-law Ryan Kennedy and Devin Kennedy (Eliza); many nieces and nephews; and countless friends and extended family members, including Sofi Bertorello.

Stefanie will be remembered as a fearless, intelligent, generous, and adventurous woman, admired by everyone lucky enough to know her.

BREAKING: Afrikaans rap sensation Angie Oeh passes away Photos: Instagram/@AngieOeh

In a poignant turn of events, young Afrikaans rap artist Angie Oeh, aged 24, has died following her struggle with recently diagnosed stage 4 lung cancer.

BREAKING NEWS – AFRIKAANS RAP SENSATION ANGIE OEH DIED IN HOSPITAL

The news of Angie's death was confirmed on Sunday morning, with the announcement made by renowned South African rocker Francois van Coke.

Her manager, Wynand Myburgh, said Angie, who was also known by her birth name [Angelique Greeff](#), was admitted to [Life Wilgers hospital](#) in Pretoria on 13 August 2023.

The rapper was diagnosed with stage four lung cancer on 14 August.

Afrikaans rapper Angelique Greeff, famously known as Angie Oeh, passed away over the weekend.

The rapper, diagnosed with stage four lung cancer on 14 August, passed away on 20 August in a hospital in Pretoria.

[Aug. 18, 2023](#) – Reno, NV – 29 year old Ezti Villanueva, who works at the veterinary clinic, was just diagnosed with Stage 4 Lung Cancer after presenting to ER with a collapsed lung and fluid in her chest.

Ezti is in desperate need of all of our help

Michelle Winans-Gomez is organizing this fundraiser on behalf of Ezti Villanueva.

Hi my name is Michelle and I am fundraising for one of my co-workers, Ezti, who works with me at the veterinary clinic that I work at.

Ezti is a beautiful 29-year-old single mom to a sweet little 3-year-old girl that has worked with me for the past five years. Ezti started feeling poorly about year ago and was advocating for herself as best as she could with her doctor, who told her she had asthma with no diagnostics confirming this or any other issues that may be going on at the beginning of this year. Throughout this year, she has progressively gotten worse with her respiratory symptoms and she had been seen countless times trying to get her symptoms under control. Sadly she has had crucial diagnostic tests rescheduled several times due to varying reasons given by the medical facility that she had to have the testing done at.

Last Friday, August 18th, Ezti ended up in the ER with difficulty breathing. It was found that she had a collapsed lung and fluid in her chest. She had 2 1/2 liters of fluid drained from her chest and was sent home where her lung collapsed again. She returned to the ER Monday and they drained another 3 liters from her chest, placed a chest tube and set her up to get the CT that she has literally waited months to have done. Long story short, with finally having the diagnostics done, as well as the fluid that was in her chest sent out for cytology, Ezti has been diagnosed with stage 4 lung cancer.

July 21, 2023 - Oakville, ON - 40 year old Anoop Singh, whose wife is a Senior advisor to Canadian Prime Minister Justin Trudeau, died on July 21, 2023 after a 7 month battle with Stage 4 Lung Cancer.

Obituary Overview

In Loving Memory

In the early hours of July 21, 2023, after 40 years in this life, Anoop Singh died in his home in Oakville, Ontario. He left on his own terms, just as he designed it: at home, next to his wife, Supriya. We will spend the rest of our lives searching for the right words to express how much we loved him, how much we still love him, and how much we miss him.

Supriya Dwivedi
@supriyadwivedi

...

This feels completely surreal to type but early on the morning of July 21, my husband Anoop passed away after 7 excruciating months with stage 4 lung cancer.

I love you, Anoop. I promise I'll find you when the game resets xo

arbormemorial.ca/glenoaks/obitu...

My Take...

At this time, no other physician in the world is publishing detailed clinical accounts of mRNA Induced Turbo Cancers in the COVID-19 Vaccinated – and certainly no one is even talking about the bizarre and extremely aggressive Turbo Lung Cancers that are presenting at Stage 3 or Stage 4, especially in the age group under 40.

Interestingly, I have found Lung cancer to be frequent enough in the COVID-19 Vaccinated, that it is either in the top 5 of most frequent Turbo Cancers or very close to it.

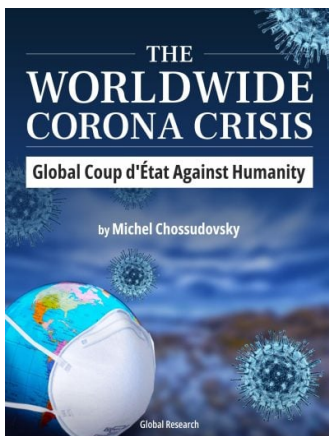

Preliminary data shows that these are all Non-small cell lung cancers with an unusually poor prognosis, refractory to all standard treatments.

Immunology. Governor General's Medal, University of Toronto Scholar. Author of 100+ peer-reviewed medical publications.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the

shutdown of the global economy. –David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. –Edward Curtin
