The indoctrination of the climate change hoax has been so well prepared, and for so long, and with billions and billions of dollars by professional social and mind engineers (i.e., the UK-based Tavistock Institute) and with the collaboration of the entire UN system – it is virtually impossible to convince the smartest, most educated, and most honest people that they have been lured into a trap.

Even when they see that something is not quite right, their quiet inner mind tells them, "Cannot be; impossible that the government, and my scientist friends lie to me..."

It is self-denial – as self-protection.

Admitting that one has been betrayed for most of one's life would be too shameful no matter how many others were lured and lied into the same trap. Admission, might be interpreted as meaning, that we are not smart. Nobody wants to be "un-smart."

It is true, though, that over the past three decades or so, the lie-talk, coming from governments, international bodies like the UN, and repeated at nauseum by the mainstream media, is so pervasive that doubting it is not only "uncool", but more so, socially and politically incorrect.

Hardly anybody wants to be socially and politically incorrect.

You are soon considered an outcast. Nobody wants to be an outcast.

The truth is, today about 90% of the official narrative, emanating from supposedly expert institutions, and from the authorities paid by your taxes – are lies, false, fake, manipulated – so you will not know the truth, so you will obey the orders that follow the lies.

Let us illuminate some facts about **climate change**.

1. The climate changes all the time – usually in “waves” of 15 – 20,000- or so years, with smaller cycles in between. Therefore, climate changes are slow, so slow that life on earth can naturally adapt, without hardly noticing anything in our short human lifespan of some 80 years.

2. More than 90%, some scientists say, between 95% and 97% of climate change is caused by solar activities, which also come in cycles. **Real scientists** say that human activities, industries, cars, agriculture – even military (which the mainstream never mentions – in the COP meetings [see below on COP] it is *strictly forbidden* to talk about the military CO2 output) – produce less than 0.3% of CO2, unnoticeable because any excesses are absorbed by the seas.

The seas also release CO2 when forests, mainly rainforests, and trees in general need more for their survival – CO2 being vital food for trees, which, in turn produce the oxygen from which most life on earth lives. A perfectly balanced symbiosis. Mother Earth knows what she is doing.

3. The key is – there is of course an agenda behind the so-called manmade CO2 caused “climate change” when Al Gore made the round in the early 2000s with his propaganda climate speeches, including at the World Bank and other international agencies, it was called “global warming”, then the narrative changed because you can do more with a both-sided, cooling and warming, “climate change”.

This idea dates back to the **Club of Rome**, their infamous 1972 report “Limits to Growth”. The Club’s first objective, as stated in the Report, is population reduction by more than 90% so that the earth’s non-renewable resources will last longer for a small elite. As simple as that.

“Limits to Growth” is still today the blueprint for the Great Reset / UN Agenda 2030. So, the population reduction narrative is still alive and well – as you know. The eugenists, Gates and Rockefellers *et al*, are quite omni-present.

See also this – quite recent, from an author of “limits to Growth”:

[Club of Rome “Limits to Growth” Author Promotes Genocide of 86% of the World’s Population](#)

By [Rhoda Wilson](#), July 08, 2023

Dennis Meadows, one of the main authors of the Club of Rome’s The Limits to Growth, is a member of the World Economic Forum. (4 May 2023)

That is where also plandemics with forced and coerces killer vaxxes come in, which will leave – according to Mike Yeadon, former VP Pfizer, then also in charge of Pfizer Research – potentially billions of people dead in the next 5-10 years. An estimated 70% of the world

population was vaccinated.

Almost nobody will be able to trace the excess mortality back to the vaxxes because the causes of death will be so many, and so diverse, that there is no clearly discernible pattern for the common cause. Scientists will be coerced to shut up – as was the case with the fake vaxxes and PCR tests.

That is one of the reasons why there were between 5 to 10 different versions of vaxxes circulating, so they can see which potions cause what kind of disease and death – and how effective and efficient the different bio-chemical compositions of vaxxes are in increasing mortality.

*

Manmade “climate change” is one of the instruments imagined by “*Limits to Growth*” for the elite to live longer and better lives, with longer-lasting non-renewable resources.

It is also a perfect tool to

(i) help decimate population, through droughts, floods, famine; extreme hurricanes, cattle killing heatwaves, and more;

(ii) earthquakes and their devastating consequences (Haiti 2010; Turkey earlier this year and Morocco a few months ago, most likely Afghanistan and Nepal too, are suspected having been geoengineered.)

So that people believe in climate change, the climate literally **MUST** change – at least on the surface – when it is all done, maybe in 10 or 20 years (*their agenda 2030 plan – which they will NOT achieve, ever*), they might think of going back to the “normal sun-caused climate change” cycles.

The climate agenda was made public by the 1992 UN-sponsored “Earth Summit” in Rio. For some 30+ years we have been indoctrinated with the idea that the climate is changing because of our climate-unfriendly habits, including the use of carbon-based energy sources.

The propaganda worked well. During annual COP Conferences around the world, the cabal behind the governments lied to us what the targets should be in reduced CO2 output so the world would not collapse. But no government ever follows the rules to meet the targets.

By now, we have had up to now 27 COP conferences, the last one in 2022 in Egypt, the next one is in December 2023 in Dubai. Nothing has changed and nothing will change, and the earth is still intact. But the criminal myth will be kept alive for the masses.

COP – stands for Conference of the Parties. It is the body of the United Nations Framework Convention on Climate Change (UNFCCC) which aims to *“guide the efforts of the countries that are parties of the Convention to act against climate change”*.

This description alone says it all. It is the epitome of hypocrisy, as no government, nor any international institutions believe in it, hence, they coerce people to abandon their life styles, forcing them out of agriculture, of traveling, forcing them to live in *15-minute-cities* (where car travel beyond 15-minutes per day is forbidden) – and more – while the elite ignores such rules, jetting around the globe in their private jets, as if there was no tomorrow.

*

In the 1990s, about 87% of all the world's energy used came from "CO2-emitting" hydrocarbons. Guess what, in 2023 almost the same percentage – about 85% still comes from hydrocarbons – the minuscule difference is well within the margin of error.

Despite the *ad nauseam* condemnation of CO2-producing hydrocarbons, the world economy could not survive without it.

Hypocrisy at its best, the European Union, "sanctioning" Russia by not buying their gas, has, in fact, imported in 2022 from Russia the second largest amount of gas since 2014. Some of the shipments were routed through India and other countries. See [this](#).

Since the early 1940's, the science of "climate change", as in *geoengineering the weather*, the climate science has been perfected. In a 1962 Harvard graduation speech, then VP Lyndon Johnson said,

"in 2025 the US will control the weather, and who controls the weather will control the world". Watch video below.

We are almost in 2025, and according to the Spanish State Meteorological Agency – AEMET, weather modification or geoengineering practices, to different degrees, are known by about 50 countries in the world, first, of course, the US, Russia, and China, but also Spain, and other EU countries possess the technology. See [this](#).

The best known agency for geoengineering is the US Airforce-controlled HAARP (High-frequency Active Auroral Research Program). HAARP works in the ionosphere. And is, as indicated earlier, capable of triggering earthquakes, when deemed "necessary" by the masters of the universe.

"Geoengineers" are artificially melting the ice in the Nord Pole as well as Antarctica, and that of the glaciers – just to make believe that the climate is changing. Documentaries will show you, indeed, how the glaciers and North and South Pole ice disappears – and how polar bears have a hard life ahead.

That is the extent to which they go to carry out their agenda. This climate change program probably costs trillions of dollars – peoples' tax money spent for willful destruction of Mother Earth's protective shields and most importantly her environmental equilibrium.

No money is too much to stop them from doing what they are doing, attempting to annihilate life on earth. But whenever that happens – we are about the 6th or 7th Civilization, Mother Earth protects herself by letting civilizations collapse. The previous ones have all disappeared, probably for human greed, egocentricities, power thirst — you name it. Our's will not be different, if

We, the People, are unable to stop it.

*

In August 2022, a conference in Switzerland focused on several controversial topics, addressed by scientists and true experts in their field.

One of them was a physicist, professor of a Swiss top university, specialized in climate and the science to modify it. He opened his speech by saying,

“You all know that our climate is manipulated, but I will explain to you how it’s done...”

Then he proceeded showing pages of pages of patents for chemicals and their combinations – used mostly in the Ionosphere, where the weather is made. He also explained what you see as “chemtrails” – and what they are doing to the climate / weather and not least to human health.

Geoengineering climate is like weaponizing the weather, it’s more efficient than nuclear explosions because it can be targeted precisely to the country or region where you want major damage to occur; and it does not leave radioactive fallouts for years to come. The Pakistan extended monsoon of 2022, was a case in point. It destroyed almost all food crops, infrastructure, housing, causing extreme poverty – and death.

It also deviated people’s attention from taking to the streets by the millions, asking to return their elected Prime Minister Imran Khan, who served as PM of Pakistanis from August 2018 until April 2022, when he was deposed by a Parliamentary Coup, orchestrated by the United States.

The climate professor also talked about electromagnetic power-waves – emitted with enormous strength from satellites – reaching up to 17-20 km below the surface. That is how earthquakes are triggered, even in areas where there are no fault lines – for example, in the recent Turkey / Syria earthquake region.

*

Social and mind manipulation is a science-driven to perfection in the last 80 some years by the UK-based Tavistock Institute (see Daniel Estulin’s book, “The Tavistock Institute: Social Engineering and Mind Manipulation”), as well as by DARPA, the Pentagon thinktank. This is done through media, schools, everyday debates among people — in a way of “divide to conquer” — all is well thought out and driven to excellence.

Many people still may not believe you, if you told them.

It explains, though, why the Climate Hoax is indeed a Climate Hoax.
