[Global Research Wants to Hear From You!](#)

So now the world knows.

The democratic government of the United States of America has been covertly supplying thousands upon thousands of high explosive, 2,000-pound (900kg) and 500-pound (225kg) bombs to the IDF to enable it to carry out the mass killing of civilians in Gaza. This fact makes the United States an accessory to mass murder in Gaza, amounting to genocide.

In the first month of its war in Gaza, Israel dropped hundreds of such massive bombs, many of them capable of killing or wounding people more than 1,000 feet away. To date, more than 100,000 have either been killed, mutilated or wounded. Primarily women and children.

These 2,000-pound bombs are four times heavier than the largest bombs the United States dropped on ISIS in Mosul, Iraq, during the war against the extremist group there.

Weapons and warfare experts blame the extensive use of heavy munitions such as the 2,000-pound bomb for the soaring death toll. The population of Gaza is more highly concentrated than almost anywhere else on earth, so the deliberate use of such heavy munitions has a profound effect that directly violates the Geneva Conventions and Article 51 of the Rome Statute of the International Criminal Court.

The use of 2,000-pound bombs in an area as densely populated as Gaza means it will take decades for communities to recover, if ever, from such crimes against humanity.
