The Shootings in Uvalde, Texas, were Staged

by Miles Mathis

I have been avoiding this one, because I have better things to do than respond to every fake event the mainstream comes up with to divert us. To the extent I take it seriously, we have been diverted. But since I have already so thoroughly bludgeoned the mainstream in the past week, with a barrage of stunning papers, there is no possible way they could claim even the smallest victory right now, no matter what I do.

Even so, I will waste as little time as possible on this theater, letting a link to the *New York Post* do most of my work for me. There, under the title "Chilling images show students at Salvador Ramos' HS pretending to be dead during active shooter drill", we find the *Post* telling you the event was a fake without telling you. In other words, they can't just come out and tell you the whole thing was staged by Intel: it is against the Phoenician rules of engagement to do that. But since the *Post* is owned by a competing team, they are allowed to push back in smaller ways, giving you all the clues but not reading them for you.

In that article, they show many pictures from a major active shooter drill run just a few weeks before the event at Uvalde High School. We see officers pointing fake guns at students, students running away, and students pretending to be dead. Even better, they admit the drill was run by Uvalde police officer Ruben Ruiz, whose wife was allegedly killed in the event two months later.

Strangely, they have already changed the picture of Ruiz, since when I first saw the article late last night, the picture of him was far larger and included his wife. They have downsized the photo and moved it to a sidebar, I guess to make it seem less obvious they are outing this event as fake.

The wife's name is Eva Mireles, so they don't have the same last name. My guess is they removed the original image from the *Post* because it was a paste-up and was a little too obvious.

So now we see why Uvalde was chosen for this latest fake news event: it already had a heavy spook presence. The Intel agencies were already busy there. We find more evidence of that from the fact that Robb elementary and other Uvalde schools had been locked down 48 times in 2021. We are told that was due to the border crisis and human smuggling, but Uvalde isn't on the border. It is about an hour away by car. And besides, the whole border crisis is also manufactured. If Uvalde schools were being locked down for any real reason beyond fear creation, it was in preparation for this event.

It is also worth remembering that Uvalde is part of the old King Ranch, run since the 1850s by very wealthy German Jews, many of them from nobility. That is where Matthew McConaughey comes from. Here he is consoling the inconsolable people of Uvalde:

Those poor grief-stricken people!

For other clues, see officer Erik Estrada of Uvalde, involved in this event. Those of you who are my age will remember actor Erik Estrada who played motorcycle cop Ponch in *ChiP*s, back in the late 1970s. Since most people with that name spell it Eric, we are being given a huge clue here. It is the usual CIA joke. They have to pack these events with fake names, and they love messing with us while they do it. It is one of the joys of being a spook, I guess. As another example, one of the victims was named Miranda Mathis, as a little shout out to me personally.

On a people search for Eva Mireles of Uvalde, I found that the Mireles family there is related to the Barrons. Barron is a Marrano name, meaning it is Jewish. It is a variant of Barent, as in Barent-Cohen. See actor Sacha Baron-Cohen, aka Borat, whose family was originally Barent. So this fake event was run using local Hispanics, but they appear to be half-Jewish, as we would have predicted going in.

This Eva Mireles is also related to a Dora Hanson, who has James Abbott on her list. How's that for a huge clue? Do you see it? Not only is Abbott a major peerage name, linking us to the King Ranch and huge wealth, it just happens to be the name of the current Governor of Texas.

So I guess this paper was worth writing after all.

Remember, Governor Greg Abbott's wife Cecilia Phalen is Hispanic. She is from San Antonio, which is just about a hour away from Uvalde.

This James Abbott is related to two Thomas Abbotts of Medina, TX, one 67 and one 78. We know because they are all related to a June Abbott and a Terry Abbott. Can we link these people to governor Greg Abbott? Well, if we do a search on him, we find he has been scrubbed. Only one relative is listed, an Audrey Abbott. That's pretty strange by itself, since we would expect his wife to be listed. Audrey is his adopted daughter, and she is also scrubbed down to her father's name. No Cecilia on her page either. A search for Cecilia Abbott pulls up a blank, as does Cecilia Phalen. The closest I get is a Celia Abbott of California. Wikipedia also scrubs the parents of Cecilia Abbott. Kind of strange that the big computer has never heard of the first lady of Texas. Intelius has also never heard of her. Remember, these are the same big computers that have never heard of our new Supreme Court Justice, Ketanji Brown-Jackson. The big computers now know everything about us, down to our buying habits, sexual quirks, and mole patterns, but they have never heard of this Supreme Court Justice or the First Lady of Texas.

So let's search on that Elizabeth Herrington on James Abbott's list. She is a goldmine, since Instantcheckmate lists about 100 relatives, including the surnames Garcia, Dimler, Dicenzo, Dearmott, Broguiere, Avodah, Abbott, Ford, Fuller, Garay, Guidry, Harris, Hernandez, Holley, Kartune, Mccaffrey, Mielke, Richards, Rios, Saleh, Salinas, Schwalm, and Wheeler. That list is rife with more red flags, since many of those names are Jewish and/or peerage. Does the Holley link us to Buddy Holly, who was actually a Holley? Probably, since I have already linked Buddy to the King Ranch people in my paper on him. He was Jewish Texas royalty like the rest of these people.

The only name we didn't get was Jacks: Greg Abbott's mother's name. So let's search on her. No Doris Abbott of Wichita Falls or Duncanville comes up. No Doris Abbott in all of Texas related to a Calvin. No Doris Jacks related to Abbotts. What about Greg's father, Calvin Rodger Abbott? Already looks like a fake name since it is normally spelled Roger or Rodgers, not Rodger. I find a probable match with a Calvin H. Abbott of Austin and Utah, since Greg Abbott also has ties to Salt Lake City.

But notice that would mean they faked the middle name. Calvin is related to Kenneth and Dorothy Abbott, not Doris, so my guess is they fudged that as well. This guy is listed a second time as Abbott W. Calvin of Austin, and we know it is the same guy because both are related to a woman named Lani. If this guy is Greg Abbott's father, we have to ask why he existed under an alias. So let's follow that Lani Abbott.

Both those women are the same person, since they both have Longmont and Albany on their lists, and both have the same middle initials. She links us to a Persephone Abbott and a Keith Abbott. Keith Abbott links us to. . . Elizabeth Herrington. We just saw her related to the people in Uvalde.

How do we know this is the right Keith Abbott, or that he is related to Greg Abbott? Notice the Duncanville listing under locations. That is where Greg Abbott went to high school. So these are his relatives.

We have come full circle. I have now linked Elizabeth Herrington to a Calvin H. Abbott of Austin, and Greg Abbott's father was Calvin Abbott. So I have proved that Governor Greg Abbott has close relatives involved in this event in Uvalde. He is related to Eva Mireles, alleged victim, through this Elizabeth Herrington.

And a reader sent me even more information: Elizabeth Herrington has Joint Base Lewis McChord in

Washington on her locations list at FamilyTreeNow. Meaning she is military, and likely Intelligence.

FamilyTreeNow also allows us to make another probable link to military here. Eva Mireles' mother-in-law Cynthia Garza has past addresses at Ft. Hood, Ft. Benning, and Ft. Irwin. Her relative Emilio Garza has addresses of Langley AFB and Moody AFB.

Added July 9, 2022: The mayor of Uvalde, Don McLaughlin, is now spilling the beans on the event, though I expect he will soon be silenced in some fashion. He just told the Texas Senate under oath that DPS was in charge of the event and that he didn't trust them. He said,

At this point, I don't know what to believe and what not to believe. I lost confidence because the narrative changed from DPS so many times and when we asked questions, we weren't getting answers. . . I think it's a cover up.

Hmmm. Could he be any clearer, short of admitting it was hoaxed? He admits there was an order not to engage for one hour and 17 minutes. Though it is doubtful that order originated with Texas DPS. Why would DPS be in charge and why would DPS give such an order? DPS is in charge of driver's licenses, vehicle inspection, and now handgun licensing. Which gives you a big clue. But still, DPS is not the agency in charge of active shooters. That would be a SWAT team sent out by some police agency, and we know Uvalde had their own SWAT team, since it was reported in the *New York Post*. We may assume the Feds beat them to the scene, but how did that happen? It is admitted the shooter was allowed to fire off shots for 12 minutes outside the school without being challenged by police already on the scene, and allowed to enter the school through a "broken" door. Which indicates the stand-down order was already in effect from the very beginning, which means the Feds were already there *before* the shooter entered the school. How did the Feds get there so fast? Did they chopper in from San Antonio in under five minutes, or are we supposed to believe the Feds just have agents across the street from every public school in America?

Of course all of this confirms the event was staged. Matthew McConaughey was probably choppered in in the first five minutes as well, to blab about gun control and put pomade in his hair and smile like a Cheshire cat.

ALERRT has now published a report on the Uvalde hoax, and there we learn the shooter entered the building at exactly 11:33:00.   What are the odds? Additionally, we are supposed to believe he went directly to room 111, though it wasn't closest to the entry point and wasn't recommended by any other distinguishing feature, other than that is was part of aces and eights.

No comment on why 11 UPD officers were the first ones into the school, and not the SWAT team. Also no indication of why the Feds who were obviously there didn't lead the charge. According to the report, the three lead officers were fired upon by the shooter at the door of room 111, and—despite wearing body armor and being heavily armed—all eleven retreated.   This of course contradicts the reports of a stand down for almost an hour and a half. The shooter has by now fired about 140 rounds, so we have to wonder just how much ammo he carried in.   Did he—like the UT shooter—have a footlocker and a dolly? Eighteen minutes in, we are told all the local police in the area are there, but still not a mention of the Feds, who we know were there. Two minutes later the ballistic shields arrive and also a special agent from the DPS, though we aren't sure why he is taking the heat here. Was he

there to check driver's licenses? Border Patrol now arrives, which is just as ridiculous. They are not the ranking or appropriate Feds for an event of this nature. We they there to check Visas and do trunk inspections? So this whole story is an obvious diversion away from the Feds you know were there: CIA/FBI/Homeland. Then nothing happens for about an hour, until an "ad hoc" team, unnamed, takes out the shooter. That's it. The report of the event ends there.
